ANTI-KLAN ISSUE WILL NOT DOWN

May Be Fought Out on Floor
of the Convention.

PROLONGED STRUGGLE SEEN

Governor Smith of the Opinion That
Balloting For Nominee Will Not
Begin Before Saturday, and Again
Expresses Belief He Will Be Nom-
inated—McAdoo Forces Putting Up
a Hard Fight.

New York, Jan. 24.—The Democratic national convention was called to order at noon today by Chairman Cordell Hull of the Democratic national committee, who made a short address before the thousands that jammed Madison Square Garden to the doors. Invocation by Cardinal P. J. Hayes followed, after which Hull introduced the temporary chairman of the convention, Senator Pat Harrison of Mississippi.

New York, June 24.—Indications are that the fight on the Ku Klux Klan issue will be bitter and prolonged.

Governor Al Smith of New York is credited with saying: "The Democratic convention won't be finished this week and as a matter of fact the delegates will be lucky if they even get to balloting by Saturday. Incidentally, I am more confident than ever of the outcome."

Opponents of William G. McAdoo will attempt to bring the anti-klan issue directly before the convention for a vote, and by winning the fight on the floor, beat McAdoo before the balloting for a nominee begins. A canvass is said to have disclosed that many delegates instructed or preferring to vote for McAdoo as the nominee are ready and anxious to vote against a strong anti-klan plank, which would name the organization specifically.

As a result the first big fight of the convention will be staged through the resolutions committee, which drafts the party platform. McAdoo adherents probably will have a majority on that committee, and this majority will report out a plank on the klan so moderate as not to name the klan directly, according to all indications. The anti-McAdoo representatives on the committee would then draft a minority anti-klan plank, naming the organization, and thus, through its report to the convention, force a vote on the two proposals.

It is at this point that the opponents of the Californian would hope to break down his forces. They claim that in some instances a majority of the McAdoo men on the delegations are for an out-and-out anti-klan plank. They claim further they have approximately 600 votes already lined up for such a minority report and that when the roll is called there will be approximately 800 ballots cast against the McAdoo klan plank recommended by the resolutions committee and in favor of the stronger minority plank. Such an overwhelming defeat for the McAdoo element in the convention, they are convinced, would definitely eliminate him, if, indeed, he would not refuse to run on a platform bearing such a plank.

Two Courses For McAdoo.

To meet this emergency the McAdoo leaders are studying the convention situation with a view to choosing between two courses: First, making a fight of it on the floor of the convention with the possibility of losing, and, second, submitting to the demands of the opposition leaders for a strong anti-klan plank, subscribing to a unanimous report from the committee on a plank naming the klan specifically, and thereby in committee eliminating the klan issue, because there would be no minority report through which to bring the matter up on the convention floor. McAdoo already has said that this and other points were matters for the convention to settle and if the delegates settled it the fight would be straight away among the candidates themselves.

McAdoo is making a fierce fight to maintain his position as leader in the convention. Beside him in his fight stands the veteran, William J. Bryan. McAdoo's fight is the sort of fight Bryan likes. And, probably through Bryan's counsel, McAdoo has personally made his issue along lines old and familiar to the Commoner, the issue of the free and open west against "invisible government of the east." In launching his open attack along this line during an address to some 300 delegates gathered in his

DRAFT PLANKS FOR PLATFORM

Party Leaders to Present Them
to Resolutions Committee.

COVER WIDE RANGE OF ISSUES

Senators Robinson and Walsh of Massachusetts Draft Complete Declaration of Principles For Presentation to the Committee—League of Nations, the Ku Klux Klan and Other Issues Bob Up.

New York, June 24.—The resolutions committee of the Democratic national convention will be deluged with platform planks covering a wide range of issues, domestic and foreign.

A declaration of principles has been drafted by Senators Walsh of Massachusetts and Robinson of Arkansas for presentation to the resolutions committee. It covers among other things charges of dishonesty in the present administration. William J. Bryan brought with him a plank which calls the Democrats to organize for international peace and to outlaw war. Former Justice John H. Clarke of the United States supreme court has prepared a plank urging American membership in the league of nations.

The Caraway-Walsh proposal declares that the American people "are profoundly shocked and deeply grieved at the utter lack of public decency and respect for law as has been manifested by this Republican administration." Their statement reflects significantly the campaign material which the Democrats hope to make of the oil scandals.

Other main planks in the Caraway-Walsh platform are: Repeal of unnecessary direct taxes and revision of the tariff; regulation of the anthracite coal industry; rehabilitation of the American merchant marine; reduction of the cost of transportation; creation of a marketing system to decrease the spread between the producer and consumer and open world markets to the farmers; membership in the world court and such other world associations as may be helpful in the promotion of world peace.

In former Justice Clarke's demand for a league plank, and in the efforts of other leading Democrats, including Bryan, to obtain a declaration for a world peace organization, there is evidence that the Democrats will hear plenty of the vexatious league of nations issue. Newton D. Baker and other backers of James M. Cox, as well as such figures as Carter Glass and Bernard Baruch, are sympathetic toward the promotion of Wilsonian principles. While many Democrats do not believe they will profit by making an issue of the league, there is nevertheless strong sentiment in favor of such action. Bryan's proposal to outlaw war does not rest upon the league. Bryan will also ask for a plank to control campaign contributions, which he predicted would be one of the big issues of the campaign.

The klan issue is sure to bob up. The Ohio delegation at its caucus here urged the resolutions committee to draft a plank condemning the klan as a menace to American institutions.

DAWN TO DUSK TRIP COMPLETED

Maughan Flies From New York
to San Francisco.

San Francisco, June 24.—The dawn-to-dusk flight from New York to San Francisco was successfully completed by Lieutenant Russell L. Maughan, army aviator.

Maughan arrived at San Francisco at 9:44 last night. He made his time for 2,670 miles air line dash from New York, including five refueling stops en route, 21 hours, 48½ minutes, slightly under his original estimate of the time the flight would consume. Maughan was tendered a great ovation. The news that he had crossed the continent without mishap within the span of a single day was received with jubilation by the aviator's fellow officers at the flying field here.

WILLIAM G. McADOO

One of Leading Candidates
For Democratic Nomination.

DOINGS IN OHIO

Donahy Refuses to Answer.

Columbus, June 24.—Governor Donahy declared that he would resist all efforts made by attorneys for C. C. Curtis, ousted mayor of Canton, to compel him to answer a subpoena relative to the hearing recently conducted by him and which resulted in the removal of Curtis from office. His refusal has created a problem without precedent in Ohio. Attorneys say that to force Governor Donahy to answer the subpoena would make the executive branch of the state government subservient to the judicial branch.

Slayer Electrocuted.

Columbus, June 24.—Vincenzo Caparra, 33, of Jefferson county, was electrocuted at the Ohio penitentiary at an early hour today for the murder of Policeman William Snider at Steubenville. Caparra was received at the penitentiary March 18, 1924. He appeared cool and collected as he spent his last hours in "death row."

Gets Stay of Execution.

Columbus, June 24.—Ohio supreme court extended the date of execution of James Brady, convicted in Erie county of murder, to Oct. 10. Brady was sentenced to die Monday, but was given a stay of execution by Governor Donahy to allow the man opportunity to present his case to the supreme court.

Swimming Teacher Drowns.

Cincinnati, June 24.—Dawson Ellison, 22, was drowned while trying to teach Flora Tarvin, 16, to swim. They were in the Little Miami river near Cincinnati when the stream, swollen after a heavy rain, drew Ellison to his death and almost claimed his pupil. The girl was rescued by her brother.

Stone Re-elected.

Cleveland, June 24.—Warren S. Stone, president of the Brotherhood of Locomotive Engineers, was re-elected by acclamation. W. B. Prenter and H. P. Daugherty were elected first and second vice presidents, respectively. Charles E. Lindquist of St. Louis was elected general secretary.

May Lose Sight.

Cleveland, June 24.—As a result of a premature explosion of a giant firecracker, Steven Fedyk, 9, may be totally blinded. A playmate was also injured. The boys said the big firecracker was given to them. A city ordinance prohibits the sale of fireworks.

Seized With Cramp.

Canton, O., June 24.—Earl Kibler, 21, of Alliance, was drowned while swimming in the lake park reservoir east of Alliance. Kibler was holding to the back of a boat when he was seized with a cramp and went down before assistance could reach him.

Couple Sentenced.

Cincinnati, June 24.—Mrs. Parline Farr, 19, "woman bandit," and her husband, Albert Farr, 25, singer, confessed oil station robber, were sentenced in municipal court each to serve one year in jail.

Girl Killed.

Washington C. H., O., June 24.—Jean Bolce, 4-year-old daughter of Earl Bolce of Cincinnati, was killed near here when the auto in which she was riding with her parents crashed into another machine.

Establishment of through motor

service between Chicago and St. Louis within the next year is planned by the Illinois Motor Coach company, which has applied for permission from the Illinois commerce commission.

MOORE ELECTED OVER DURBIN

Ohio Delegation Names Him
National Committeeman.

ANTI-KLAN PLANK INDORSED

Baker Instructed to Press It Before
the Resolutions Committee—Adop-
tion of Plank Favoring League of
Nations Predicted by Former War
Secretary—Campbell Selected as
Chairman of Ohio Delegation.

New York, June 24.—The Ohio delegation to the Democratic national convention at its caucus here, elected Ed Moore of Youngstown, veteran Democratic leader, national committeeman to succeed George White of Marietta. Moore was selected over W. W. Durbin of Kenton, state central chairman.

Other selections were: Mrs. Bernice Pyke of Cleveland, associate national committeewoman from Ohio; Newton D. Baker of Cleveland, member of convention platform committee; James E. Campbell of Columbus, chairman of the delegation; Charles V. Truax, secretary; Albee Pomerene, member of convention rules committee; Lieutenant Governor Earl E. Bloom, member of credentials committee; W. A. Julian, Mrs. Minnie of committee to notify the nominee, of committee to notify the nominee.

The Ohio delegation adopted unanimously the Ed Moore resolution strongly denouncing Ku Klux Klan "interference in politics and government." The Ohioans without a dissenting vote instructed Newton D. Baker of Cleveland, the Buckeye member of the resolutions committee, to urge the platform makers to write into the Democratic platform the Moore plank, or its spirit, which denounced the klan "as a menace to the perpetuity of American institutions." Baker said he would follow the delegation's instructions. This definitely assures a fight in the resolutions committee over the klan issue.

"Unless you destroy the klan, the klan will destroy the Democratic party, and it will split the northern and southern Democracy," Moore told the delegation. The unanimity with which the Ohioans adopted the anti-klan plank, which names the masked order by name, was surprising even to Moore himself.

The matter of "chief and primary interest" to him, Baker said, was the insertion of a plank favoring the league of nations. Baker said he believed the bulk of delegates favored such a plank and added that he anticipated no difficulty in obtaining its adoption.

John A. O'Dwyer of Toledo was elected a delegate-at-large from Ohio by the alternate delegates-at-large. O'Dwyer's selection was the result of the absence of former Senator Pomerene, a delegate-at-large. Mr. O'Dwyer is empowered to vote in the balloting to select presidential and vice presidential nominees, in case Pomerene fails to be present.

OHIO REPUBLICANS MEET

To Draft Platform and Nominate Candidates For Electors.

Columbus, June 24.—The Ohio Republican convention is scheduled to open here at 4 p. m. today. Attorney Gilbert Bettman of Cincinnati will deliver the keynote speech, and is slated to hold the temporary chairmanship. W. H. Duffy, secretary of the state committee, will act as secretary of the convention, and E. H. Stiemmons as sergeant-at-arms.

The convention will draft and adopt a state platform and nominate 24 candidates for presidential electors. The final session of the convention will be held Wednesday.

General Charles G. Dawes, Republican candidate for vice president, declined an invitation to address the convention. He wired: "To make my participation in the convention most effective, must decline such invitation as that expressed in your letter of June 18 until after notification of nomination."

Allies to Hold Conference.

London, June 24.—Premier Ramsay MacDonald announced in the house of commons that he had invited the United States to participate in an inter-allied conference in London on July 16, to discuss the experts' plan.

Smashed Speed Record.

Paris, June 24.—Sadi LeCointe, French aviator, competing in the Beaumont cup speed races, established a world's record for 500 kilometers of 1 hour, 37 minutes and 49 seconds, or 306 kilometers an hour.

LAKE RESORTS SAFE

Vacationists Need Have No Fear of Infection, Monger Says.

Columbus, June 24.—Dr. John E. Monger, state director of health, announced that Ohioans need have no fear of going to either Buckeye or Indian lakes, as far as dangers from insanitation are concerned. Not everything has been done that is required, but the work is far enough advanced that vacationists need have no fear on the score of health if they visit these two summer resorts.

"Sanitary conditions at both Buckeye Lake and Indian Lake have been improved to the extent that they furnish supervised public health supplies," Dr. Monger said, adding that "so far as we know, these are the only large resorts in this part of the country that have these advantages. Marked improvement is being made in sanitary conditions on state-owned property at Buckeye Lake. This work has been delayed by continuous rains, but is being completed rapidly. At Indian Lake property owners have done much to improve sanitary conditions, and are moving for completion of the work through the creation of a sanitary district."

Policeman's Slayer to Die.

Columbus, June 24.—Charles Thomas must die in the electric chair for the murder of Troy C. Stewart, Columbus policeman. A jury in Judge Warner's court found Thomas guilty of the charge. It made no recommendation of mercy. Stewart was killed on April 23 while he was pursuing a party of negroes who had taken part in a shooting affray over a woman.

AGAINST GAS TAX

State Automobile Association to Hold Convention This Week.

Columbus, June 24.—The Ohio State Automobile association will hold its convention at Cedar Point on Lake Erie Friday and Saturday of this week. A number of state officials are on the program to make addresses. Governor A. V. Donahy will be the chief speaker, and other questions of state government will be discussed by Secretary of State Thad H. Brown, Chief Highway Commissioner George F. Schlesinger, Attorney General C. C. Crabbe and State Auditor Joseph T. Tracy. Secretary Charles C. Jones of the association said Monday that one of the chief things to be inaugurated at the convention would be the organization of a campaign against any gasoline tax in Ohio that is not a substitute for present taxation.

HERE AND THERE

Dr. Percy Stickney Grant denied he had resigned as pastor of the Church of the Ascension, New York, to wed Mrs. Rita de Acosta Lydig. British steamer Clan MacMillan sank in the bay of Bengal. The crew is missing.

Six government air mail planes were wrecked when a severe wind blew the roof off a hangar at Omaha, Neb.

Clarence Reynolds, 28, of Gritton, Okla., aviator, plunged 300 feet to his death during an aerial circus at Lexington, Ky.

ANTI-KLAN ISSUE WILL NOT DOWN

May Be Fought Out on Floor
of the Convention.

PROLONGED STRUGGLE SEEN

Governor Smith of the Opinion That
Balloting For Nominee Will Not
Begin Before Saturday, and Again
Expresses Belief He Will Be Nom-
inated—McAdoo Forces Putting Up
a Hard Fight.

New York, Jan. 24.—The Demo-
cratic national convention was called
to order at noon today by Chairman
Cordell Hull of the Democratic na-
tional committee, who made a short
address before the thousands that
jammed Madison Square Garden to
the doors. Invocation by Cardinal P.
J. Hayes followed, after which Hull
introduced the temporary chairman
of the convention, Senator Pat Har-
rison of Mississippi.

New York, June 24.—Indications
are that the fight on the Ku Klux
Klan issue will be bitter and pro-
longed.

Governor Al Smith of New York
is credited with saying: "The Demo-
cratic convention won't be finished
this week and as a matter of fact the
delegates will be lucky if they even
get to balloting by Saturday. Inci-
dentally, I am more confident than
ever of the outcome."

Opponents of William G. McAdoo
will attempt to bring the anti-klan
issue directly before the convention
for a vote, and by winning the fight
on the floor, beat McAdoo before the
balloting for a nominee begins. A
canvass is said to have disclosed
that many delegates instructed or pre-
ferring to vote for McAdoo as the
nominee are ready and anxious to
vote against a strong anti-klan plank,
which would name the organization
specifically.

As a result the first big fight of
the convention will be staged through
the resolutions committee, which
drafts the party platform. McAdoo
adherents probably will have a ma-
jority on that committee, and this
majority will report out a plank on the
Klan so moderate as not to name the
Klan directly, according to all indica-
tions. The anti-McAdoo representa-
tives on the committee would then
draft a minority anti-klan plank, nam-
ing the organization, and thus, through
its report to the convention, force
a vote on the two proposals.

It is at this point that the oppo-
nents of the Californian would hope
to break down his forces. They claim
that in some instances a majority of
the McAdoo men on the delegations
are for an out-and-out anti-klan
plank. They claim further they have
approximately 600 votes already lined
up for such a minority report and
that when the roll is called there
will be approximately 800 ballots cast
against the McAdoo plank plank re-
commended by the resolutions com-
mittee and in favor of the stronger
minority plank. Such an overwhelm-
ing defeat for the McAdoo element
in the convention, they are convinced,
would definitely eliminate him, if,
indeed, he would not refuse to run
on a platform bearing such a plank.

Two Courses For McAdoo.

To meet this emergency the Mc-
Adoo leaders are studying the con-
vention situation with a view to
choosing between two courses: First,
making a fight of it on the floor of
the convention with the possibility
of losing, and, second, submitting to
the demands of the opposition lead-
ers for a strong anti-klan plank, sub-
scribing to a unanimous report from
the committee on a plank naming the
Klan specifically, and thereby in com-
mittee eliminating the Klan issue, be-
cause there would be no minority re-
port through which to bring the mat-
ter up on the convention floor. Mc-
Adoo already has said that this and
other points were matters for the
convention to settle and if the dele-
gates settled it the fight would be
straight away among the candi-
dates themselves.

McAdoo is making a fierce fight to
maintain his position as leader in the
convention. Beside him in his fight
stands the veteran, William J. Bryan.
McAdoo's fight is the sort of fight
Bryan likes. And, probably through
Bryan's counsel, McAdoo has person-
ally made his issue along lines old
and familiar to the Commoner, the
issue of the free and open west
against "invisible government of the
east." In launching his open attack
along this line during an address to
some 300 delegates gathered in his

JAMES M. COX
Ohio Democrats' Choice For
the Presidential Nomination.

headquarters, McAdoo cut the strings
completely that might have been
pulled on the leaders here.

Forced Out of Mexico.
Laredo, Tex., June 24.—H. A. Cum-
mings, British agent in Mex-
ico City, who was forced out of the
country by the Mexican government,
made light of his predicament when he
arrived here safely, but declared
he had not only in behalf of British
citizens whose property had been
seized without redress. Cum-
mings is now en route to New York.

Worker Electrocuted.
Cincinnati, June 24.—Sam See, 35,
superintendent of construction at
Sam 38, near Rising Sun, Ind., was
electrocuted when he attempted to
lift a highly charged electric wire
from the road out of the way of his
automobile.

DRAFT PLANKS FOR PLATFORM

Party Leaders to Present Them
to Resolutions Committee.

COVER WIDE RANGE OF ISSUES

Senators Robinson and Walsh of Mas-
sachusetts Draft Complete Declara-
tion of Principles For Presenta-
tion to the Committee—League of
Nations, the Ku Klux Klan and
Other Issues Bob Up.

New York, June 24.—The resolu-
tions committee of the Democratic
national convention will be deluged
with platform planks covering a wide
range of issues, domestic and for-
eign.

A declaration of principles has
been drafted by Senators Walsh of
Massachusetts and Robinson of Ar-
kansas for presentation to the resolu-
tions committee. It covers among
other things charges of dishonesty in
the present administration. William
J. Bryan brought with him a plank
which calls the Democrats to organi-
ze for international peace and to out-
law war. Former Justice John H.
Clarke of the United States supreme
court has prepared a plank urging
American membership in the league
of nations.

The Caraway-Walsh proposal de-
clares that the American people "are
profoundly shocked and deeply grieved
at the utter lack of public decency
and respect for law as has been man-
ifested by this Republican adminis-
tration." Their statement reflects
significantly the campaign material
which the Democrats hope to make
of the oil scandals.

Other main planks in the Caraway-
Walsh platform are: Repeal of un-
necessary direct taxes and revision
of the tariff; regulation of the an-
thraxite coal industry; rehabilitation
of the American merchant marine;
reduction of the cost of transporta-
tion; creation of a marketing system
to decrease the spread between the
producer and consumer and open
world markets to the farmers; mem-
bership in the world court and such
other world associations as may be
helpful in the promotion of world
peace.

In former Justice Clarke's demand
for a league plank, and in the efforts
of other leading Democrats, includ-
ing Bryan, to obtain a declaration for
a world peace organization, there is
evidence that the Democrats will
hear plenty of the vexatious league
of nations issue. Newton D. Baker
and other backers of James M. Cox,
as well as such figures as Carter
Glass and Bernard Baruch, are sym-
pathetic toward the promotion of Wil-
sonian principles. While many Demo-
crats do not believe they will profit
by making an issue of the league,
there is nevertheless strong senti-
ment in favor of such action. Bryan's
proposal to outlaw war does not rest
upon the league. Bryan will also ask
for a plank to control campaign con-
tributions, which he predicted would
be one of the big issues of the cam-
paign.

The Klan issue is sure to bob up.
The Ohio delegation at its caucus
here urged the resolutions committee
to draft a plank condemning the Klan
as a menace to American institu-
tions.

DAWN TO DUSK TRIP COMPLETED

Maughan Flies From New York
to San Francisco.

San Francisco, June 24.—The dawn-
to-dusk flight from New York to San
Francisco was successfully completed
by Lieutenant Russell L. Maughan,
army aviator.

Maughan arrived at San Francisco
at 9:44 last night. He made his time
for 2,670 miles air line dash from
New York, including five refueling
stops en route, 21 hours, 48½ min-
utes, slightly under his original esti-
mate of the time the flight would con-
sume. Maughan was tendered a great
ovation. The news that he had
crossed the continent without mishap
within the span of a single day was
received with jubilation by the avi-
ator's fellow officers at the flying field
here.

WILLIAM G. McADOO
One of Leading Candidates
For Democratic Nomination.

DOINGS IN OHIO

Donahey Refuses to Answer.

Columbus, June 24.—Governor Dona-
hey declared that he would resist all
efforts made by attorneys for C. C.
Curtis, ousted mayor of Canton, to
compel him to answer a subpoena
relative to the hearing recently con-
ducted by him and which resulted
in the removal of Curtis from office.
His refusal has created a problem
without precedent in Ohio. Attorneys
say that to force Governor Donahey
to answer the subpoena would make
the executive branch of the state
government subservient to the judi-
cial branch.

Slayer Electrocuted.

Columbus, June 24.—Vincenzo Cap-
arra, 33, of Jefferson county, was
electrocuted at the Ohio penitentiary
at an early hour today for the mur-
der of Policeman William Snider at
Steubenville. Caparra was received
at the penitentiary March 18, 1924.
He appeared cool and collected as
he spent his last hours in "death
row."

Gets Stay of Execution.

Columbus, June 24.—Ohio supreme
court extended the date of execution
of James Brady, convicted in Erie
county of murder, to Oct. 10. Brady
was sentenced to die Monday, but
was given a stay of execution by Gov-
ernor Donahey to allow the man op-
portunity to present his case to the
supreme court.

Swimming Teacher Drowns.

Cincinnati, June 24.—Dawson Eli-
son, 22, was drowned while trying to
teach Flora Tarvin, 16, to swim.
They were in the Little Miami river
near Cincinnati when the stream,
swollen after a heavy rain, drew Eli-
son to his death and almost claimed
his pupil. The girl was rescued by
her brother.

Stone Re-elected.

Cleveland, June 24.—Warren S.
Stone, president of the Brotherhood
of Locomotive Engineers, was re-
elected by acclamation. W. B. Pre-
nter and H. P. Daugherty were elected
first and second vice presidents, re-
spectively. Charles E. Lindquist of
St. Louis was elected general secre-
tary.

May Lose Sight.

Cleveland, June 24.—As a result of
a premature explosion of a giant fire-
cracker, Steven Fedyk, 9, may be to-
tally blinded. A playmate was also
injured. The boys said the big fire-
cracker was given to them. A city
ordinance prohibits the sale of fire-
works.

Seized With Cramp.

Canton, O., June 24.—Earl Kibler,
21, of Alliance, was drowned while
swimming in the lake park reservoir
east of Alliance. Kibler was holding
to the back of a boat when he was
seized with a cramp and went down
before assistance could reach him.

Couple Sentenced.

Cincinnati, June 24.—Mrs. Pauline
Farr, 19, "woman bandit," and her
husband, Albert Farr, 25, singer, con-
fessed oil station robber, were sen-
tenced in municipal court each to
serve one year in jail.

Girl Killed.

Washington C. H., O., June 24.—
Jean Bolce, 4-year-old daughter of
Earl Bolce of Cincinnati, was killed
near here when the auto in which she
was riding with her parents crashed
into another machine.

Establishment of through motor
service between Chicago and St.
Louis within the next year is planned
by the Illinois Motor Coach company,
which has applied for permission
from the Illinois commerce commis-
sion.

MOORE ELECTED OVER DURBIN

Ohio Delegation Names Him
National Committeeman.

ANTI-KLAN PLANK INDORSED

Baker Instructed to Press It Before
the Resolutions Committee—Adop-
tion of Plank Favoring League of
Nations Predicted by Former War
Secretary—Campbell Selected as
Chairman of Ohio Delegation.

New York, June 24.—The Ohio
delegation to the Democratic nation-
al convention at its caucus here,
elected Ed Moore of Youngstown, vet-
eran Democratic leader, national
committeeman to succeed George
White of Marietta. Moore was
selected over W. W. Durbin of Ken-
ton, state central chairman.

Other selections were: Mrs. Ber-
nice Pyke of Cleveland, associate na-
tional committeewoman from Ohio;
Newton D. Baker of Cleveland, mem-
ber of convention platform commit-
tee; James E. Campbell of Columbus,
chairman of the delegation; Charles
V. Truax, secretary; Atlee Pomerene,
member of convention rules commit-
tee; Lieutenant Governor Earl E.
Bloom, member of credentials com-
mittee; W. A. Julian, Mrs. Minnie
of committee to notify the nominee.
of committee to notify the nominee.

The Ohio delegation adopted unani-
mously the Ed Moore resolution
strongly denouncing Ku Klux Klan
"interference in politics and govern-
ment." The Ohioans without a dis-
senting vote instructed Newton D.
Baker of Cleveland, the Buckeye
member of the resolutions committee,
to urge the platform makers to write
into the Democratic platform the
Moore plank, or its spirit, which de-
nounced the Klan "as a menace to
the perpetuity of American institu-
tions." Baker said he would follow
the delegation's instructions. This
definitely assures a fight in the resolu-
tions committee over the Klan is-
sue.

"Unless you destroy the Klan, the
Klan will destroy the Democratic
party, and it will split the northern
and southern Democracy," Moore told
the delegation. The unanimity with
which the Ohioans adopted the anti-
Klan plank, which names the masked
order by name, was surprising even
to Moore himself.

The matter of "chief and primary
interest" to him, Baker said, was the
insertion of a plank favoring the
league of nations. Baker said he be-
lieved the bulk of delegates favored
such a plank and added that he an-
ticipated no difficulty in obtaining its
adoption.

John A. O'Dwyer of Toledo was
elected a delegate-at-large from Ohio
by the alternate delegates-at-large.
O'Dwyer's selection was the result
of the absence of former Senator
Pomerene, a delegate-at-large. Mr.
O'Dwyer is empowered to vote in the
balloting to select presidential and
vice presidential nominees, in case
Pomerene fails to be present.

OHIO REPUBLICANS MEET

To Draft Platform and Nominate Can-
didates For Electors.

Columbus, June 24.—The Ohio Re-
publican convention is scheduled to
open here at 4 p. m. today. Attor-
ney Gilbert Bettman of Cincinnati
will deliver the keynote speech, and
is slated to hold the temporary chair-
manship. W. H. Duffy, secretary of
the state committee, will act as sec-
retary of the convention, and E. H.
Stemmons as sergeant-at-arms.

The convention will draft and
adopt a state platform and nominate
24 candidates for presidential elec-
tors. The final session of the con-
vention will be held Wednesday.
General Charles G. Dawes, Repub-
lican candidate for vice president,
declined an invitation to address the
convention. He wired: "To make
my participation in the convention
most effective, must decline such in-
vitation as that expressed in your
letter of June 18 until after notifica-
tion of nomination."

Allies to Hold Conference.

London, June 24.—Premier Ramsay
McDonald announced in the house of
commons that he had invited the
United States to participate in an
international conference in London on
July 16, to discuss the experts' plan.

Smashed Speed Record.

Paris, June 24.—Sadi LeCointe,
French aviator, competing in the
Beaumont cup speed races, estab-
lished a world's record for 500 kilo-
meters of 1 hour, 37 minutes and 49
seconds, or 306 kilometers an hour.

LAKE RESORTS SAFE

Vacationists Need Have No Fear of
Infection, Monger Says.

Columbus, June 24.—Dr. John E.
Monger, state director of health, an-
nounced that Ohioans need have no
fear of going to either Buckeye or
Indian lakes, as far as dangers from
insanitation are concerned. Not
everything has been done that is re-
quired, but the work is far enough
advanced that vacationists need have
no fear on the score of health if they
visit these two summer resorts.

"Sanitary conditions at both Buck-
eye Lake and Indian Lake have been
improved to the extent that they fur-
nish supervised public health sup-
plies," Dr. Monger said, adding that
"so far as we know, these are the
only large resorts in this part of the
country that have these advantages.
Marked improvement is being made
in sanitary conditions on state-owned
property at Buckeye Lake. This
work has been delayed by contin-
uous rains, but is being completed rap-
idly. At Indian Lake property owners
have done much to improve sanitary
conditions, and are moving for com-
pletion of the work through the crea-
tion of a sanitary district."

Policeman's Slayer to Die.

Columbus, June 24.—Charles Thom-
as must die in the electric chair for
the murder of Troy C. Stewart, Co-
lumbus policeman. A jury in Judge
Warner's court found Thomas guilty
of the charge. It made no recom-
mendation of mercy. Stewart was
killed on April 23 while he was pur-
suing a party of negroes who had
taken part in a shooting affray over
a woman.

AGAINST GAS TAX

State Automobile Association to Hold
Convention This Week.

Columbus, June 24.—The Ohio
State Automobile association will
hold its convention at Cedar Point
on Lake Erie Friday and Saturday
of this week. A number of state offi-
cials are on the program to make
addresses. Governor A. V. Donahey
will be the chief speaker, and other
questions of state government will
be discussed by Secretary of State
Thad H. Brown, Chief Highway Com-
missioner George F. Schlesinger, At-
torney General C. C. Crabbe and
State Auditor Joseph T. Tracy. Sec-
retary Charles C. Jones of the asso-
ciation said Monday that one of the
chief things to be inaugurated at the
convention would be the organization
of a campaign against any gasoline
tax in Ohio that is not a substitute
for present taxation.

HERE AND THERE

Dr. Percy Stickney Grant denied
he had resigned as pastor of the
Church of the Ascension, New York,
to wed Mrs. Rita de Acosta Lydig.
British steamer Clan MacMillan
sank in the bay of Bengal. The crew
is missing.
Six government air mail planes
were wrecked when a severe wind
blew the roof off a hangar at Omaha,
Neb.

Clarence Reynolds, 28, of Gritton,
Okla., aviator, plunged 300 feet to
his death during an aerial circus at
Lexington, Ky.

MARKET QUOTATIONS

Yale Gets Papers of Great Colonial Divine

The Yale university library has been presented with a collection of the once famous "Thumb Papers" of the Rev. Timothy Edwards, father of Jonathan Edwards, colonial New England's great theologian, says the New York Times. Puritan and colonial New England for the most part had some contempt for a parson who would either read his sermons or preach with anything more than the briefest reference to notes. A great exhorter had to be inspired, else he had no right to occupy a pulpit in those stern fundamentalist days. Many great theologians would open the Bible at random, seize any verse as a text and then preach from that text for hours with the firm belief that the hand of the Almighty had guided him to the chapter and verse upon which he based his sermon.

The Rev. Timothy Edwards belonged to that school. A graduate of Harvard of the class of 1691, he was ordained pastor of a newly-founded Congregational church at Windsor, Conn., in 1694 and occupied the pulpit of that church for 64 years. He was well acquainted with Hebrew literature and was particularly distinguished for his accurate knowledge of the Latin and Greek classics. In preparing his sermons Mr. Edwards would note on small slips of paper his "firstlines" and "secondlines." Then he would study these manuscript outlines, but when he entered the pulpit he would leave them in his study.

For many years it was his custom to preach entirely without notes, but one sermon, a copy of which is in the Yale library, is known to have been written in full by Mr. Edwards. This was preached at the general election in 1732.

Of these papers, Dr. Sereno Edwards Dwight, son of the elder president Timothy Dwight, wrote: "He always preached extemporaneously, and, until he was upwards of seventy, without noting down the heads of his discourse. After that time he commonly wrote the divisions on small slips of paper, which, as they occasionally appeared between the leaves of the Bible that he held in his hand, his parishioners called 'Mr. Edwards' thumb papers.'"

These papers, the gift to Yale of Dr. James Hosmer Penniman of Philadelphia, cover 98 pages and include sermons preached in 1722 and 1723.

Motor Displaces Dog

The march of science into the frozen expanses of the far North is bringing a new era of rapid communication across the wildernesses of snow. Mail planes equipped with landing skis, and swift, motorized sleds may soon replace the picturesque dog teams, just as the motor car is replacing the camel of the desert.

The United States Postoffice department recently announced plans for airplane mail service from the terminus of the government railway at Nenana, Alaska, to Fairbanks. Thus a 20-day delivery service by dog team will be supplanted by a four-hour mail service.

A more dramatic transition, according to Popular Science Monthly, is that from dog-drawn sleds to sleds driven by motor. These already have made their appearance in Finland, a motorcycle engine furnishing the propulsion through a bicycle wheel. The contact of the rubber tire with the snow is said to create sufficient friction to drive the sled forward. The cheapness, lightness and convenience of these new vehicles make them, it is said, admirably suited for traveling over the snows.

Fishing in Liberia

Fishing, says a writer in the Wide World Magazine, is one of Liberia's biggest industries, fish comprising, perhaps, the most prominent item in the daily menu of the masses. In the rainy season the rivers overflow their banks and large areas of low-lying country become temporary lakes, abounding with fish of all kinds. As the waters subside, one species, the mudfish, a black, repulsive looking fellow, settles in the mud, which is presently baked hard by the sun. The natives then dig holes with picks and unearth the apparently lifeless fish, following which it is cured and stored for domestic purposes. Those fish which are lucky enough to escape detection come to life again, so to speak, with the return of the rainy season.

Hard to Kill

From South Carolina comes the story of a farmer who decided to find out just how much heat and cold a boll weevil can stand. He caught one and froze it into a cake of ice, left it there for 24 hours, then thawed the ice and was astonished to see the bug stretch its wings and walk away. He caught it again, put it under a pan on the stove and built up a good fire. The stove got red hot, the pan got red hot, and evidently the weevil also got red hot. At any rate when the farmer lifted the pan the weevil flew out the window and set fire to the barn. The moral of the yarn is not quite clear, but probably it has something to do with the old maxim: Never depend on the weather to kill bugs.—Youth's Companion.

Long in One Factory

Swiss papers report the recent retirement of a seventy-two-year-old textile worker of Wattwil, after having worked in the same factory since her eighth birthday. Her last day was made a festive occasion by her fellow-tollers. The table at which she had labored so many years was covered with flowers and more material gifts.

Whole World in Need of New Mark Tapley

It was an English humorist, Charles Dickens, who invented that supreme type of the laughing philosopher, Mark Tapley. Mark Tapley was a kind of Don Quixote of humor. He made it his business to seek out those most desperate situations, in which most people would find little enough to laugh at and pit his invincible gaiety against their blackest gloom.

The drearier the situation in which he found himself the higher his spirits would rise, and the only occasions on which he grew mournful were those which were not gloomy enough to afford a worthy background for his art says Richard Le Gallienne in *McNaught's Monthly*. He was a priceless creation and he should be living at this hour, for the food for his mirth was surely never so mysteriously plentiful. How the European situation would make him rub his hands with delight! For, while on every hand the prophets of woe are vaticinating the direct happenings, he would contrive somehow to extract sunshine from the lanky chaos and gild the storm clouds with rainbows.

No more valuable human being could be born just now than a new Mark Tapley. The whole world cries out for him. For, while we could well do with a higher percentage of greatness in our statesmen, there is no one we need so much as a new great humorist, that once more the world may return to laughter.

We have plenty of minor humorists both in England and America. I don't know how it is with France and Italy. From all accounts, laughter is not quite dead even in soviet Russia. But since Mark Twain there is no great world laughter, no humorist on a large international scale. Our humorists are all sectional. We have no humorist big enough to lash the gloom away with satire, to bring good humor back to the world and rouse it out of its doleful dumps.

If you say that there is not much to laugh at, the spirit of Mark Tapley is ready with the retort that evidently then the more need for laughter.

A Stony Ancestor

Josiah Quincy, of Boston, tells of how he was once identified by a laborer who was enlightening a friend. "That is Josiah Quincy," said the first laborer. "An' who is Josiah Quincy?" demanded the other. "Don't ye know who Josiah Quincy is?" demanded the first man; "I niver saw sich ignorance. Why, he's the grandson of the statue out there in the yard."

REMEMBER

WE DO THE BEST CLEANING AND PRESSING IN TOWN.
GEO. W. LITTLETON

Ingenious Band Saw.

There is in use an ingenious sort of band saw for coarse work, such as felling trees and sawing stove wood. The saw, instead of being a continuous ribbonlike blade, is made up of links, like those of the driving chain of a bicycle. On their outer side they have teeth of extremely hard steel. The endless chain is supported on four ball-bearing sprocket wheels mounted in a light metal frame. A 5-horse power benzine motor drives it.

Not When but Where.

Mrs. X—"Dear me! I've broken my looking glass. Seven years of bad luck, I s'pose." Mrs. Y—"Don't you believe it, Mrs. X. A friend o' mine broke hers and she didn't have seven years' bad luck! She was killed in an explosion two days later; so you needn't worry."—London Answers.

The Family Wash

The old-time prosperous family that used to unfurl to the neighborly vision 400 feet of clothesline fluttering like white sails in a yacht race now has a successor that washes its silken lingerie in the washbowl and dries it on the radiator overnight.—Houston Post.

Raphael's Many Duties

Raphael's activity during the reigns of Popes Julius II and Leo X was prodigious. Besides painting he was chief architect of St. Peter's, guardian of antiquities, and prepared a great work on Roman archeology.

Yale Gets Papers of Great Colonial Divine

The Yale university library has been presented with a collection of the once famous "Thumb Papers" of the Rev. Timothy Edwards, father of Jonathan Edwards, colonial New England's great theologian, says the New York Times. Puritan and colonial New England for the most part had some contempt for a person who would either read his sermons or preach with anything more than the briefest reference to notes. A great exhorter had to be inspired, else he had no right to occupy a pulpit in those stern fundamentalist days. Many great theologians would open the Bible at random, seize any verse as a text and then preach from that text for hours with the firm belief that the hand of the Almighty had guided him to the chapter and verse upon which he based his sermon.

The Rev. Timothy Edwards belonged to that school. A graduate of Harvard of the class of 1691, he was ordained pastor of a newly-founded Congregational church at Windsor, Conn., in 1694 and occupied the pulpit of that church for 64 years. He was well acquainted with Hebrew literature and was particularly distinguished for his accurate knowledge of the Latin and Greek classics. In preparing his sermons Mr. Edwards would note on small slips of paper his "firstlines" and "secondlines." Then he would study these manuscript outlines, but when he entered the pulpit he would leave them in his study.

For many years it was his custom to preach entirely without notes, but one sermon, a copy of which is in the Yale library, is known to have been written in full by Mr. Edwards. This was preached at the general election in 1732.

Of these papers, Dr. Sereno Edwards Dwight, son of the elder president Timothy Dwight, wrote: "He always preached extemporaneously, and, until he was upwards of seventy, without noting down the heads of his discourse. After that time he commonly wrote the divisions on small slips of paper, which, as they occasionally appeared between the leaves of the Bible that he held in his hand, his parishioners called 'Mr. Edwards' thumb papers.'"

These papers, the gift to Yale of Dr. James Hosmer Penniman of Philadelphia, cover 68 pages and include sermons preached in 1722 and 1723.

Motor Displaces Dog

The march of science into the frozen expanses of the far North is bringing a new era of rapid communication across the wildernesses of snow. Mail planes equipped with landing skis, and swift, motorized sleds may soon replace the picturesque dog teams, just as the motor car is replacing the camel of the desert.

The United States Postoffice department recently announced plans for airplane mail service from the terminus of the government railway at Nenana, Alaska, to Fairbanks. Thus a 20-day delivery service by dog team will be supplanted by a four-hour mail service.

A more dramatic transition, according to Popular Science Monthly, is that from dog-drawn sleds to sleds driven by motor. These already have made their appearance in Finland, a motorcycle engine furnishing the propulsion through a bicycle wheel. The contact of the rubber tire with the snow is said to create sufficient friction to drive the sled forward. The cheapness, lightness and conveniences of these new vehicles make them, it is said, admirably suited for traveling over the snows.

Fishing in Liberia

Fishing, says a writer in the Wide World Magazine, is one of Liberia's biggest industries, fish comprising, perhaps, the most prominent item in the daily menu of the masses. In the rainy season the rivers overflow their banks and large areas of low-lying country become temporary lakes, abounding with fish of all kinds. As the waters subside, one species, the mudfish, a black, repulsive looking fellow, settles in the mud, which is presently baked hard by the sun. The natives then dig holes with picks and unearth the apparently lifeless fish, following which it is cured and stored for domestic purposes. Those fish which are lucky enough to escape detection come to life again, so to speak, with the return of the rainy season.

Hard to Kill

From South Carolina comes the story of a farmer who decided to find out just how much heat and cold a boll weevil can stand. He caught one and froze it into a cake of ice, left it there for 24 hours, then thawed the ice and was astonished to see the bug stretch its wings and walk away. He caught it again, put it under a pan on the stove and built up a good fire. The stove got red hot, the pan got red hot, and evidently the weevil also got red hot. At any rate when the farmer lifted the pan the weevil flew out the window and set fire to the barn. The moral of the yarn is not quite clear, but probably it has something to do with the old maxim: Never depend on the weather to kill bugs.—Youth's Companion.

Long in One Factory

Swiss papers report the recent retirement of a seventy-two-year-old textile worker of Wattwil, after having worked in the same factory since her eighth birthday. Her last day was made a festive occasion by her fellow-tollers. The table at which she had labored so many years was covered with flowers and more material gifts.

Whole World in Need of New Mark Tapley

It was an English humorist, Charles Dickens, who invented that supreme type of the laughing philosopher, Mark Tapley. Mark Tapley was a kind of Don Quixote of humor. He made it his business to seek out those most desperate situations, in which most people would find little enough to laugh at and pit his invincible gaiety against their blackest gloom.

The drearier the situation in which he found himself the higher his spirits would rise, and the only occasions on which he grew mournful were those which were not gloomy enough to afford a worthy background for his art. Says Richard Le Gallienne in *McNaught's Monthly*. He was a price-less creation and he should be living at this hour, for the food for his mirth was surely never so mysteriously plentiful. How the European situation would make him rub his hands with delight! For, while on every hand the prophets of woe are vaticinating the direct happenings, he would contrive somehow to extract sunshine from the inky chaos and gild the storm clouds with rainbows.

No more valuable human being could be born just now than a new Mark Tapley. The whole world cries out for him. For, while we could well do with a higher percentage of greatness in our statesmen, there is no one we need so much as a new great humorist, that once more the world may return to laughter.

We have plenty of minor humorists both in England and America. I don't know how it is with France and Italy. From all accounts, laughter is not quite dead even in soviet Russia. But since Mark Twain there is no great world laughter, no humorist on a large international scale. Our humorists are all sectional. We have no humorist big enough to lash the gloom away with satire, to bring good humor back to the world and rouse it out of its doleful dumps.

If you say that there is not much to laugh at, the spirit of Mark Tapley is ready with the retort that evidently then the more need for laughter.

A Stony Ancestor

Josiah Quincy, of Boston, tells of how he was once identified by a laborer who was enlightening a friend. "That is Josiah Quincy," said the first laborer. "An' who is Josiah Quincy?" demanded the other. "Don't ye know who Josiah Quincy is?" demanded the first man; "I never saw sich ignorance. Why, he's the grandson of the statue out there in the yard."

AND PRESSING IN TOWN.
GEO. W. LITTLETON.

Ingenious Band Saw

There is in use an ingenious sort of band saw for coarse work, such as felling trees and sawing stove wood. The saw, instead of being a continuous ribbonlike blade, is made up of links, like those of the driving chain of a bicycle. On their outer side they have teeth of extremely hard steel. The endless chain is supported on four ball-bearing sprocket wheels mounted in a light metal frame. A 5-horse power benzine motor drives it.

Not When but Where

Mrs. X—"Dear me! I've broken my looking glass. Seven years of bad luck, I s'pose." Mrs. Y—"Don't you believe it, Mrs. X. A friend o' mine broke hers and she didn't have seven years' bad luck! She was killed in an explosion two days later; so you needn't worry."—London Answers.

The Family Wash

The old-time prosperous family that used to unfurl to the neighborly vision 400 feet of clothesline fluttering like white sails in a yacht race now has a successor that washes its silken lingerie in the washbowl and dries it on the radiator overnight.—Houston Post.

Raphael's Many Duties

Raphael's activity during the reigns of Popes Julius II and Leo X was prodigious. Besides painting he was chief architect of St. Peter's, guardian of antiquities, and prepared a great work on Roman archeology.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

DO YOU KNOW THAT

1. Run-down shoe heels are not easy seen by the wearer, but they detract greatly from your otherwise good appearance?
2. When heel linings are torn, relining will greatly cut the stocking bill?
3. Welt shoes for ladies are more economical to resole than Turn shoes?
4. Heels can be changed in any shape or height?
5. Kid leather shoes of any color can be dyed black to look like new?
6. It pays to have your shoes repaired at the best shop in town and one that has always had for its motto:

Work of Posterity

When we plant a tree, we are doing what we can to make our planet a more wholesome and happier dwelling place for those who come after us, if not for ourselves.—Oliver Wendell Holmes.

MIGRANTS

The birds set forth on their migrant flight. A living cloud on the darkened night; So swift their pace as they hastened on The world rolled under their echelon.

They steered with never a guiding line But found their way by a chart divine. A wondrous map that their fathers knew When earth was young and the first birds flew.

A lighthouse stood on their pathway clear. A man-made warning of danger near: The rays with a blinding brilliance shone For perils never a bird had known.

They breasted the storm and sea in vain To dash their wings on the lighthouse pane. Poor feathered fools—they were not to blame! The migrant angels have done the same.

How U. S. and Britain Fixed Boundary Line

The famous slogan, "Fifty-four forty or fight!" was first written by Enoch W. Eastman, a delegate to a Democratic county convention in Iowa. He wrote some resolutions about local politics, and then added: "In the matter of the northwestern boundary we are for 'Fifty-four forty or fight.'" A state convention later adopted the same resolution. It was taken up by the Democratic press and speakers and spread like wildfire. In the guesses made by the public as to who was the author of the watchword, many prominent Democrats were named, but most of them centered on Lewis Cass of Michigan.

Caught up as a party cry and with the "reoccupation" of the whole of Oregon inserted side by side with the annexation of Texas as a plank of the Democratic platform on which James K. Polk was nominated for the presidency, the country, during the campaign of 1844 rang with the defiant slogan.

James Buchanan, secretary of state, offered the old line of the forty-ninth parallel between British and American possessions west of the Rockies, an offer that was rejected by Great Britain. Polk withdrew Buchanan's offer and reasserted his determination to stand out for the whole of Oregon.

And before the summer of 1846 arrived Great Britain had accepted the forty-ninth parallel as the demarcation line between her Far West possessions and those of the United States, on the precise terms which the United States had from the first been willing to accept. Polk had been "bluffing."—Detroit News.

Mimosa Plant Protects Itself in Odd Manner

The mimosa of Brazil is a plant which reveals more "intelligence," perhaps, than any other. A footfall, a light touch, or any sudden disturbance will cause the leaves to close together and hang as though they had suddenly wilted.

Grazing animals are attracted by the light green leaves of the mimosa. At their approach the plant will begin to droop. The attractive fresh leaves of a moment before look dry and utterly unappetizing. The marauding animal does not fancy the dried-up dinner and so it moves on.

Should the animal, however, be particularly hungry, and inclined to investigate further, he gets some nasty pricks from the long sharp thorns with which the stems of the plant are studded. He is soon convinced that a meal in this spot would be accompanied by much pain, so he goes. A few minutes after the danger is past the mimosa will resume its usual appearance and look as green and fresh as ever.

"Don Quixote"

Shakespeare himself has written nothing so full of the diverse stuff or experience, so quietly and steadily illuminated by gentle wisdom, so open-eyed in discerning the strength of the world; and Shakespeare himself is not more courageous in championing the rights of the gallant heart. How is it that at every step of our journey we come to like the Don better, until in the end we can hardly put a limit to our love and reverence for him? Is it possible that the criticism is double-edged, and that what we are celebrating with our laughter is the failure of the world?—Sir Walter Raleigh, in "Some Authors."

PROOF.

"That fellow wouldn't lend money to his best friend. He refused to buy one of Uncle Sam's Liberty Bonds."

Ant Empires

Some surprising facts have been gathered with respect to the mound-making ants of the Alleghenies. McCook has measured some mounds more than thirty feet in circumference, although rarely more than three feet in height. But around these there are many new mounds in course of construction, only a few inches in height. They are found in groups, of which one contains 1,700 mounds within a space of fifty acres. Their total population is enormous, and each group of mounds appears to constitute a community—an insect kingdom or empire.

First Aid.

When traveling in a crowded street car, a man's first concern should be to put his feet where they will not be stepped on by the other passengers. The best way to do this is to suspend yourself from the straps in the manner of an African monkey doing his daily dozen in the treetops. Then you can get a first mortgage on a vacant seat by simply dropping into it.

When a middle-aged lady stands beside you, it is wise to become suddenly interested in your newspaper. She will swear softly at you in Sanskrit, but you can escape listening to her remarks by leaving the car and walking the rest of the way home.—Chicago American.

Wanted to Try It

Bessie was lunching with her mother in a restaurant.

Mother (helping herself to sauce)—You won't like this, dear. It's parsley sauce.

Bessie—Oh, let me have some. I know I should like it.

"Why, dear, you haven't tasted it."

"No; but I've read about it in the Bible."

"Where?"

"I've been reading about the man who was 'sick of the parsley,' and I want to try it."

CEMENT—LIME.

Shakespeare

Four portraits of Shakespeare are sufficiently diverse to add piquancy to the question, "What did Shakespeare really look like?" The painting called the Felton portrait, first discovered in a broker's shop in the Minorities in 1788, by "a gentleman of fashion," shows him beardless except for a slight tuft of hair under the lower lip and a small fair mustache. The Lumley portrait, which was originally in possession of Lord Lumley, a contemporary of the poet, is more in keeping with the generally accepted fancy of Shakespeare's appearance. He is shown with a florid complexion, a close-cropped beard and small brown mustache.

HERRICK REFRIGERATORS

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

HERRICK REFRIGERATORS

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

RECORDS SMASHED

Navy Seaplanes in Endurance and Distance Tests.

Washington, June 24.—World records for seaplanes, including the endurance and distance records, were broken and one world record established by Lieutenants F. W. Wead and J. D. Price in a flight which ended when their naval craft was forced down by engine trouble. The navy flyers, who took the air from the Anacostia naval air station here at 12:10 p. m. Sunday in a new type of scouting, bombing and torpedo plane, made a sustained flight of 13 hours and 23 minutes and covered a distance of 1,550 kilometers. The present recognized endurance record is 11 hours and 16 minutes and the distance record 125 kilometers. In addition the flight smashed the speed record for both the 500 and 1,000 kilometer distance with an average of 73.41 miles an hour against the record of 71.98 miles for the first and 74.27 miles against the record of 70.49 miles for the second. For the 1,500 kilometer distance a record of 74.17 miles an hour was set up.

REDMEN RECEPTION

Thursday Evening, June 26, to Honor Great Chief L. E. Miller.

Congo Tribe No. 51, Improved Order of Red Men of this city, has issued invitations to all the tribes thruout the state to attend the reception to be held in their wigwam in the Memorial hall on Thursday evening, June 26, honoring their Great Chief and Brother L. E. Miller, whose election to the stump of great sachem of the Great Reservation of Ohio, took place in Columbus on May 14.

The invitation is open to all Red Men and bids by far to be the largest gathering of Red Men held in this wigwam in recent years.

The committee on arrangements is: George C. Voll, Chairman
A. C. Wilson
W. D. Shelby
Albert Palm
John Goff
W. H. Palm

2:30 o'clock form parade and march to cemetery
Brother L. E. Miller, marshal of the day
Address at Cemetery
..... Rev. H. H. Wilbur

EGG PRODUCTION

Four Flocks Averaged More Than Sixteen Per Hen in May.

Four flocks in Pickaway county keeping records in cooperation with the Extension Department of Ohio State university and Pickaway County Farm bureau averaged more than sixteen eggs per hen for the month of May. Mrs. J. D. Carter, of Deercreek township, is in first place with her flock of White Leghorns averaging 20.85 eggs. Second place goes to Miss Mary McKenzie of Pickaway township with an average of 19.11 eggs per hen for her flock of White Leghorns. Mrs. E. H. Wardell, of Wayne township, is third with an average of 18.18 for her Black Minorcas. Fourth place goes to Mrs. C. D. Rector, of Wayne township with an average of 16.52 for her flock of White Leghorns and Rhode Island Reds.

SWARTZBAUGH PROMOTED.

W. V. Swartzbaugh, for the past ten years, district superintendent of the Prudential Life Insurance company in Chillicothe, leaves July 1, for Toledo, Ohio, where he will take charge of that district for the same company.

A Keats Phrase

"Here are sweet peas," he said, "on tip-toe for a flight"—a phrase which will give grace, better than water, to your garden. For words make the world grow—not I think, because they express a feeling, for that means that they relieve you of it, but because they give to the feeling a locality and distinct body. It comes down like dew out of the general air and alights here in a bright drop.—Max Eastman.

MUMMIES FOUND
IN KENTUCKY CAVE

Catacomb Discovered Under Ruins of Old City.

To students of American antiquities it is probably of general knowledge that the city of Lexington, Ky., stands nearly on the site of an ancient town, which, if one may judge by the wide range of its circumvallatory works and the quantity of ground it must have occupied, was one of great extent and magnificence.

It may, however, well be doubted if many of even such students are aware that in the year 1775 there was discovered there a catacomb containing a number of mummies, preserved by the art of embalming to as great a state of perfection as was known among the ancient Egyptians, 1,800 years before the Christian era.

This extraordinary find was made by some of the early settlers, whose curiosity being excited by something unusual in the character of certain large stones, seeming to cover the entrance to a cavern of some sort, removed the same, coming to others whose singular appearance caused them to push their investigations further. These obstructions being taken away, the mouth of an apparently deep and gloomy cave was disclosed to their gaze. This proved to be a catacomb, formed in the bowels of the limestone rock, about 15 feet below the surface of the earth.

Having added to their numbers and provided lights, they descended and entered, without further obstruction, a spacious apartment, where they were astounded to find that at the sides and extreme ends were formed niches and compartments occupied by figures representing men.

Their surprise was much greater when, on further research and inquiry, it was found that these figures were actual mummies in the condition before stated. Most unfortunately, the original discoverers were uneducated people and, it being at a period when a bloody and inveterate war was being carried on between the Indians and the whites, supposing, in their ignorance, that these were the remains of some tribe of Indians, a revengeful and vindictive spirit urged them to destruction.—Adventure Magazine.

Believed in Books

Even at an early age Andrew Carnegie believed in books. The impulse to found libraries—so we learn from Mr. A. B. Farquhar in the "First Million the Hardest"—came to him when he was only a messenger boy. Early one morning, says Mr. Farquhar, Carnegie was sent with a dispatch to Mr. Anderson, the steel master of Allegheny, with instructions to wait for an answer. Mr. Anderson had returned late the night before, and the butler said he could not wake him. Young Carnegie walked into the library, and became immersed in a volume on steel making and the tremendous advantages of steel over iron. When Mr. Anderson finally came down with his answer the boy turned and apologized for having taken the book. Mr. Anderson asked whether he was interested in steel. "Oh, yes, it is fascinating to me," Carnegie replied. "Take the book home and read it, and return it when you are through with it," said Mr. Anderson. Carnegie did so, and was told to take another; then Mr. Anderson said he might have access to the library. Carnegie then and there made up his mind that if he ever became wealthy he would found libraries, and give young men the same opportunity that he was enjoying.

Ripening

It is one of the charms of art that it is not to be completely understood. In an age in which so high a value is put upon facts, information, positive knowledge, it is a relief to have still reserved to us a place apart where it is not necessary to know all. . . . The truth of art . . . does not seem to be all known, finished and finally stated, but on the contrary to be ever growing, more rich in significance, more profound in substance, disclosing heaven over heaven and depth under depth. The greatest books share our lives, and grow old with us; we read them over and over, and at each decade it is a new book that we find there, so much has it gained in meaning from experience of life, from ripening judgment, from the change of seasons in the soul.—George E. Woodberry, in "The Heart of Man and Other Papers."

A Poor Substitute

The motorcar was bumping and jolting along the country road at a pace of about four miles an hour. The road seemed unworthy of the name—it was more like a cart-track. There were holes nearly everywhere, and where there weren't holes there were ruts.

The passenger in the back seat began to get very fed up after about an hour spent in traveling in this way. He leaned over the driver and said:

"Are you sure we've taken the best road?"

"I'm sure we've not," replied the driver. "But I'm pretty sure that some one else has, and a nice thing they've left in its place."

Lost His Case

"Gentlemen of the jury," said a blundering barrister in a suit about a lot of hogs, "there were just 36 hogs in that drove; please to remember that fact—36 hogs—just exactly three times as many as there are in the jury box."

That counsel did not win his case.

NO SECRECY

In Wireless Service—Governments Use Cables.

The Telegraph and Telephone Age in its current issue carried an article headed "Wireless Telegraphy vs. Submarine Cables" from a London correspondent which reads in part as follows:

"While not desirous of minimizing in any way the marvelous development that has taken place in the wireless telegraphy world, we must not lose sight of the fact that considerable development has taken place in the operation of submarine cables. Wireless has undoubtedly taken a permanent place in the realm of electrical communication and is rendering and will continue to render a great service mostly in "broadcasting" ship-to-ship" and shore-to-shore communication, but the highest authorities are still unanimous that it will never be the equal of the cables in responding to the exacting demand of the business community for secrecy, speed and reliability. The virtue of "broadcasting" in itself at once defeats one of the most important functions of telegraphic communication, which is secrecy and this fact was so fully recognized by the British government during the great war as to cause them to close down the only trans-Atlantic circuit then working between Clifden, Ireland and Glace Bay, Canada. A still later instance in this respect has come to light since the inauguration of a wireless service between London and Paris, when it was found that telegrams addressed to Paris and transmitted from London to that city were picked up daily in Amsterdam, Holland.

"This lack of secrecy is well known to those behind the scenes in the telegraph and cable business but is a serious realization to business people particularly when competition is concerned. Another weakness in wireless telegraphy is the very serious interference of atmospheric disturbances which are so powerful at times as to prevent transmission entirely for many lengthy periods. This was confirmed in a recent issue of "The Fortnightly Review" by no less an authority than Sir Charles Bright.

"The statement recently published that the wireless service between London and Paris had become so efficient that the majority of telegrams between the two cities were being carried by the wireless is to say the least incorrect. As a matter of fact the London-Paris wireless circuit has never had a full day's business since its inauguration in January, 1921. In conclusion it is very significant that new cables are still being made and laid, not only between England and France, but in all parts of the world and the cable companies continue to pay good dividends, even bonus dividends in some cases but we have yet to learn of any revenue being earned by the wireless people."

BOYS TAKEN TO COLUMBUS.

Paul Delgi and his accomplice Joseph Dina, the two boys placed under arrest by the local police department, after they admitted stealing a Ford sedan in Columbus Monday morning were taken to the Capital City Monday evening by Officers Rader and Dunn.

MRS. CLARA WRIGHT

Died at White Cross Hospital, Columbus.

Following Operation.
Mrs. Clara S. Wright, wife of George Wright, passed away at White Cross hospital, Columbus, Monday afternoon. The deceased underwent an operation last Thursday. She has been ill of complications for several years.

Mrs. Wright was born in Walnut township February 2, 1886, and was the daughter of William S. and Elizabeth Oman Reber. She was married to George Wright of Madison township, November 7, 1907. Her husband survives.

Of her immediate family there are living one brother and two sisters. They are Misses May C. Reber and Emma A. Reber and Homer S. Reber.

The funeral services will be held at the Lutheran church at Ashville Wednesday afternoon at 2 o'clock. Interment will be in Reber Hill cemetery.

Mr. Wright, the husband of the deceased is connected with the Hosler Packing company of this city as one the partners. His wife was a first cousin of Mrs. Walter and Mrs. George Marion of this city.

Thru the efforts of the executive board of the Pickaway County Past Grand's association, I. O. O. F., district No. 59, composed of Circleville, Ashville, Derby, Atlanta and Tarlton, and the auxiliaries of Ashville, Atlanta and Derby, a joint county memorial service will be held Sunday, June 29, at Columbia lodge room from 10 a. m. until 4 p. m. Lunch in lodge room from 11 to 12:30 served by the members of the Rebekah lodges.

The program after luncheon will be: Opening Hymn

Prayer Rev. H. H. Wilbur

Music Boys' Band

I. O. O. F. Home, Springfield, Ohio

Address... Brother Meeker Terwilliger

Music Ashville Band

Closing Hymn

2:30 o'clock form parade and march to cemetery

Brother L. E. Miller, marshal of the day

Address at Cemetery Rev. H. H. Wilbur

EGG PRODUCTION

Four Flocks Averaged More Than Sixteen Per Hen in May.

Four flocks in Pickaway county keeping records in cooperation with the Extension Department of Ohio State university and Pickaway County Farm bureau averaged more than sixteen eggs per hen for the month of May.

Mrs. J. D. Carter, of Deercreek township, is in first place with her flock of White Leghorns averaging 20.85 eggs.

Second place goes to Miss Mary McKenzie of Pickaway township with an average of 19.11 eggs per hen for her flock of White Leghorns.

Mrs. E. H. Wardell, of Wayne township, is third with an average of 18.18 for her Black Minorcas.

Fourth place goes to Mrs. C. D. Rector, of Wayne township with an average of 16.52 for her flock of White Leghorns and Rhode Island Reds.

SWARTZBAUGH PROMOTED.

W. V. Swartzbaugh, for the past ten years, district superintendent of the Prudential Life Insurance company in Chillicothe, leaves July 1, for Toledo, Ohio, where he will take charge of that district for the same company.

A Keats Phrase

"Here are sweet peas," he said, "on tip-toe for a flight"—a phrase which will give grace, better than water, to your garden. For words make the world grow—not, I think, because they express a feeling, for that means they relieve you of it, but because they give to the feeling a locality and distinct body. It comes down like dew out of the general air and alights here in a bright drop.—Max Eastman.

MUMMIES FOUND IN KENTUCKY CAVE

Catacomb Discovered Under Ruins of Old City.

To students of American antiquities it is probably of general knowledge that the city of Lexington, Ky., stands nearly on the site of an ancient town, which, if one may judge by the wide range of its circumvallatory works and the quantity of ground it must have occupied, was one of great extent and magnificence.

It may, however, well be doubted if many of even such students are aware that in the year 1775 there was discovered there a catacomb containing a number of mummies, preserved by the art of embalming to as great a state of perfection as was known among the ancient Egyptians, 1,800 years before the Christian era.

This extraordinary find was made by some of the early settlers, whose curiosity being excited by something unusual in the character of certain large stones, seeming to cover the entrance to a cavern of some sort, removed the same, coming to others whose singular appearance for stones in a natural state caused them to push their investigations further. These obstructions being taken away, the mouth of an apparently deep and gloomy cave was disclosed to their gaze. This proved to be a catacomb, formed in the bowels of the limestone rock, about 15 feet below the surface of the earth.

Having added to their numbers and provided lights, they descended and entered, without further obstruction, a spacious apartment, where they were astounded to find that at the sides and extreme ends were formed niches and compartments occupied by figures representing men.

Their surprise was much greater when, on further research and inquiry, it was found that these figures were actual mummies in the condition before stated. Most unfortunately, the original discoverers were uneducated people and, it being at a period when a bloody and inveterate war was being carried on between the Indians and the whites, supposing, in their ignorance, that these were the remains of some tribe of Indians, a revengeful and vindictive spirit urged them to destruction.—Adventure Magazine.

Believed in Books

Even at an early age Andrew Carnegie believed in books. The impulse to found libraries—so we learn from Mr. A. B. Farquhar in the "First Million the Hardest"—came to him when he was only a messenger boy. Early one morning, says Mr. Farquhar, Carnegie was sent with a dispatch to Mr. Anderson, the steel master of Allegheny, with instructions to wait for an answer. Mr. Anderson had returned late the night before, and the butler said he could not wake him. Young Carnegie walked into the library, and became immersed in a volume on steel making and the tremendous advantages of steel over iron. When Mr. Anderson finally came down with his answer the boy turned and apologized for having taken the book. Mr. Anderson asked whether he was interested in steel. "Oh, yes, it is fascinating to me," Carnegie replied. "Take the book home and read it, and return it when you are through with it," said Mr. Anderson. Carnegie did so, and was told to take another; then Mr. Anderson said he might have access to the library. Carnegie then and there made up his mind that if he ever became wealthy he would found libraries, and give young men the same opportunity that he was enjoying.

Ripening

It is one of the charms of art that it is not to be completely understood. In an age in which so high a value is put upon facts, information, positive knowledge, it is a relief to have still reserved to us a place apart where it is not necessary to know all. The truth of art does not seem to be all known, finished and finally stated, but on the contrary to be ever growing, more rich in significance, more profound in substance, disclosing heaven over heaven and depth under depth. The greatest books share our lives, and grow old with us; we read them over and over, and at each decade it is a new book that we find there, so much has it gained in meaning from experience of life, from ripening judgment, from the change of seasons in the soul.—George E. Woodberry, in "The Heart of Man and Other Papers."

A Poor Substitute

The motorcar was bumping and jolting along the country road at a pace of about four miles an hour. The road seemed unworthy of the name—it was more like a cart-track. There were holes nearly everywhere, and where there weren't holes there were ruts.

The passenger in the back seat began to get very fed up after about an hour spent in travelling in this way. He leaned over the driver and said: "Are you sure we've taken the best road?"

"I'm sure we've not," replied the driver. "But I'm pretty sure that some one else has, and a nice thing they've left in its place."

Lost His Case

"Gentlemen of the jury," said a blundering barrister in a suit about a lot of hogs, "there were just 36 hogs in that drove; please to remember that fact—36 hogs—just exactly three times as many as there are in the jury box."

That counsel did not win his case.

NO SECRECY

In Wireless Service—Governments Use Cables.

The Telegraph and Telephone Age in its current issue carried an article headed "Wireless Telegraphy vs. Submarine Cables" from a London correspondent which reads in part as follows:

"While not desirous of minimizing in any way the marvelous development that has taken place in the wireless telegraphy world, we must not lose sight of the fact that considerable development has taken place in the operation of submarine cables. Wireless has undoubtedly taken a permanent place in the realm of electrical communication and is rendering and will continue to render a great service mostly in "broadcasting" ship-to-ship and shore-to-shore communication, but the highest authorities are still unanimous that it will never be the equal of the cables in responding to the exacting demand of the business community for secrecy, speed and reliability. The virtue of "broadcasting" in itself at once defeats one of the most important functions of telegraphic communication, which is secrecy and this fact was so fully recognized by the British government during the great war as to cause them to close down the only trans-Atlantic circuit then working between Clifden, Ireland and Glace Bay, Canada. A still later instance in this respect has come to light since the inauguration of a wireless service between London and Paris, when it was found that telegrams addressed to Paris and transmitted from London to that city were picked up daily in Amsterdam, Holland.

"This lack of secrecy is well known to those behind the scenes in the telegraph and cable business but is a serious realization to business people particularly when competition is concerned. Another weakness in wireless telegraphy is the very serious interference of atmospheric disturbances which are so powerful at times as to prevent transmission entirely for many lengthy periods. This was confirmed in a recent issue of "The Fortnightly Review" by no less an authority than Sir Charles Bright.

"The statement recently published that the wireless service between London and Paris had become so efficient that the majority of telegrams between the two cities were being carried by the wireless is to say the least incorrect. As a matter of fact the London-Paris wireless circuit has never had a full day's business since its inauguration in January, 1921. In conclusion it is very significant that new cables are still being made and laid, not only between England and France, but in all parts of the world and the cable companies continue to pay good dividends, even bonus dividends in some cases but we have yet to learn of any revenue being earned by the wireless people."

BOYS TAKEN TO COLUMBUS.

Paul Delgi and his accomplice Joseph Dina, the two boys placed under arrest by the local police department, after they admitted stealing a Ford sedan in Columbus Monday morning were taken to the Capital City Monday evening by Officers Rader and Dunn.

PEOPLE'S COLUMN

MRS. CLARA WRIGHT

Died at White Cross Hospital, Columbus, Following Operation.

Mrs. Clara S. Wright, wife of George Wright, passed away at White Cross hospital, Columbus, Monday afternoon. The deceased underwent an operation last Thursday. She has been ill of complications for several years.

Mrs. Wright was born in Walnut township February 2, 1886, and was the daughter of William S. and Elizabeth Oman Reber. She was married to George Wright of Madison township, November 7, 1907. Her husband survives.

Of her immediate family there are living one brother and two sisters. They are Misses May C. Reber and Emma A. Reber and Homer S. Reber.

The funeral services will be held at the Lutheran church at Ashville Wednesday afternoon at 2 o'clock. Interment will be in Reber Hill cemetery.

Mr. Wright, the husband of the deceased is connected with the Hosler Packing company of this city as one the partners. His wife was a first cousin of Mrs. Walter and Mrs. George Marion of this city.

C. OF C. ELECTION.

AMUSEMENTS

The Paramount picturization of Rudyard Kipling's famous story, "The Light That Failed," was given a most successful presentation at the Met theater last night. This is one of the really big pictures of the year, produced by George Melford and featuring Jacqueline Logan, Percy Marmont, Sigrid Holmquist and David Torrence.

The story tells of an English boy and girl, who are sweethearts. Dick Helder is a dreamer and Mairie his inspiration. As a man Dick is an unsuccessful artist, down and out in the underworld of Port Said, from which he is rescued by Torpenhow, a war correspondent who induces Dick to accompany him as a sketch artist to the battlefields of Soudan. Dick receives a sabre wound in the forehead resulting in the loss of his eyesight just after the completing of his masterpiece inspired by Mairie and posed for by Bessie Broke, a girl of the streets, befriended by Torpenhow and whom she loves.

Bessie's lovmaking is discouraged by Dick who induces Torpenhow to go away and forget the girl. Enraged at this, Bessie destroys the portrait, but blindness prevents Dick from knowing. On hearing of Dick's misfortune Mairie goes to him and cares for him, now that the light has failed. The ending for both is happy.

"The Light That Failed" is a powerful production. Supporting the principal players in the picture is a fine cast of players including Mabel Van Buren, Luke Cosgrave, Peggy Shaffer, Winston Miller and Mary Jane Irving.

NOTICE, RED MEN.

On the sleep of the 26th Sun Hot Moon Congo Tribe will give a grand reception to our Brother L. E. Miller, great sachem of Ohio, to which all the Indians of this or any other hunting grounds are cordially invited to be present. All the great chiefs will be here, also Red Men's orchestra of Springfield will be with us. You will hear some good music and good, long talks by live wire Red Men. Plenty of Good eats. Come and enjoy the good things on this occasion as it only occurs once in a life time.

FARMS FOR SALE.

73 acre tract with a nice cozy new 6 room frame dwelling with a nice verande 7x24, good 6 horse frame barn 32x42, smoke, butcher, tool and poultry house, cattle shed 16x45, young orchard 50 or 60 trees, well tiled and fenced, all tillable, located on a good pike 2 miles from school and market. This is a good general purpose farm and price and terms are right.

66 1/2 acre tract with a new 5 room frame dwelling and a new barn 40x60 large hog and poultry house, double corn crib and granary; all buildings wired for electricity, well tiled and fenced and all tillable, 1 1/2 miles from school and a short distance from market, located on a fine pike; this is an ideal place to live.

94 1/2 acre tract with 5 room frame dwelling, good barn 30x40 with metal roof, cornerib, smoke and poultry house, cattle shed and a garage, fairly fenced, located on a good road close to school and market. This is a good stock farm and the price is right.

82 acre tract 8 room frame bungalow with slate roof, 12 horse barn, metal roof, implement shed, garage, with cement floor, cornerib and barn, silo, light plant, poultry, meat and coal house with a small orchard supplied with water pumping engine, well tiled and fenced and all tillable, located on a good pike 4 miles to market and school; this is a fine home. Let us hear from you.

For information call or write CIRCLE REALTY CO. W. C. Morris, Secretary. Phone 234.

ARCH CULVERT

Half of Expense of Construction to be Paid to State of Ohio.

Director of Highways and Public Works L. A. Boulay is advertising for bids for the construction of a reinforced concrete arch bridge over Hargus creek on North Court street, this city at an estimated cost of \$41,910.80.

One-half of the cost of this improvement will be paid by the state of Ohio and this was made possible by the passage of Senator Chappellear's bill authorizing the state in proper cases to bear fifty per cent or less, of the expense of building bridges and culverts in municipalities.

The passage of this law was attended with more difficulties than any other enactment of the legislature in the last four years. In the 84th general assembly it was passed by both houses, but was vetoed by Governor Davis. In the senate the bill was passed over the governor's veto, but in the house it was buried in committee and could not be resurrected at that session.

In the 85th general assembly Senator Chappellear promptly reintroduced the bill and it passed both houses by a big vote and was approved by Governor Donahey and finally became a law.

The expenditure of all the energy, time and worry necessary to secure the enactment of this section is amply justified when we consider the fact that approximately \$20,000 is saved to the taxpayers of Pickaway county and the more important fact that residents to the north of Hargus creek are to be relieved of flood dangers.

Circleville, very properly, is the first municipality in the state to be benefited by the provisions of this act.

SOCIAL CALENDAR

One of the most enjoyable events of the season was the gathering of friends and former schoolmates at the beautiful country home of Mr. and Mrs. Harvey T. Hill, of near Darbyville, Sunday, June 22. All came with well filled baskets of good things to eat which was spread on long tables and was most thoroly enjoyed at the noon hour. In the evening ice cream and cake were served, after which all departed for their homes declaring it a day of great pleasure and that the host and hostess were real entertainers and the Hill home an ideal place for such a gathering.

Ninety guests were present as follows: Mr. and Mrs. M. C. Edwards, Golda Blessing, Mr. and Mrs. Russell Hill and family, Mr. and Mrs. Pearl Gochenour, Mr. and Mrs. W. W. Bauhan Ernest Blessing, Mr. and Mrs. Brough Graham and family, of Derby; Mr. and Mrs. Scott Wehe and family and Mr. and Mrs. Ezra Hill, of Columbus; Mr. and Mrs. John Porter, Nellie Porter, Carl Porter, Mr. and Mrs. George Graham and family, Warner T. Graham and family, Mr. and Mrs. Clarence Porter, Miss Floral Holdren, of Mt. Sterling; Mr. and Mrs. Guy Gulick and family, Mr. and Mrs. Fred Thrallkill, of Commercial Point; Mr. and Mrs. Sherman Graham and family, Mr. and Mrs. Frank A. Beatty and family, of Orient; Mr. and Mrs. Millard Gulick and family, of Lancaster; Mr. and Mrs. C. E. Hill and daughter, Helen, of Williamsport; Mr. and Mrs. James Porter and family, of Five Points; Mr. and Mrs. John M. Davis and daughter Ruth, H. B. Darst, Miss Mary Darst, Mrs. Aldie Robey, Mr. and Mrs. Harry Hill and family, of Darbyville; Mr. and Mrs. Cecil Porter and Miss Elizabeth Dornsife, of Circleville.

It was decided to make this reunion an annual affair to be held, at the same place June 23, 1925, and it is hoped that those who were unable to attend Sunday can be present.

Miss Ann Carle, of Columbus, daughter of Mr. and Mrs. Theodore Carle of this city, and Mr. Harry Keeton, were married this afternoon at the Holy Name rectory, Columbus. The bride's parents, Mr. and Mrs. Theodore Carle, attended the wedding.

Unstoppable Magistrate—Not even Solomon with all his wisdom could stop a woman from slamming the door when she is in a temper.

PICKAWAY LODGE NO. 23, F. & A. M. Special Communication

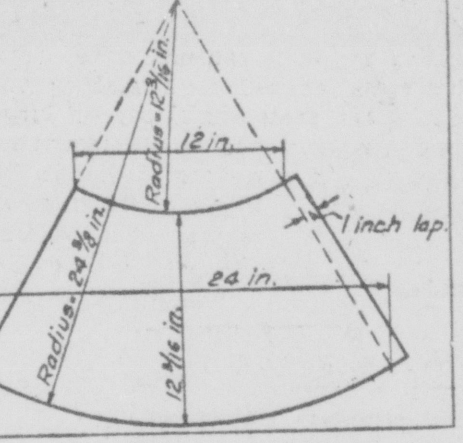

Wednesday evening, June 25, at 7:30 o'clock. Work in the M. M. degree. Brethren urged to be present. H. B. COLWELL, W. M. M. B. Trout, Secretary. 24June12.

Concrete Mixed With Accuracy

Strength of Material Is Determined by Amount of Water Employed.

Few persons realize, perhaps, how great an effect a difference in the proportion of water can have in the mixing of concrete. There are many who do not realize that for each pint of unnecessary water added to a concrete mixture the strength of the finished concrete may be decreased as much as if two pounds of portland cement had been left out.

The best concrete mixture is that which is as stiff as can be mixed conveniently. Even this will not be of the maximum strength which could be

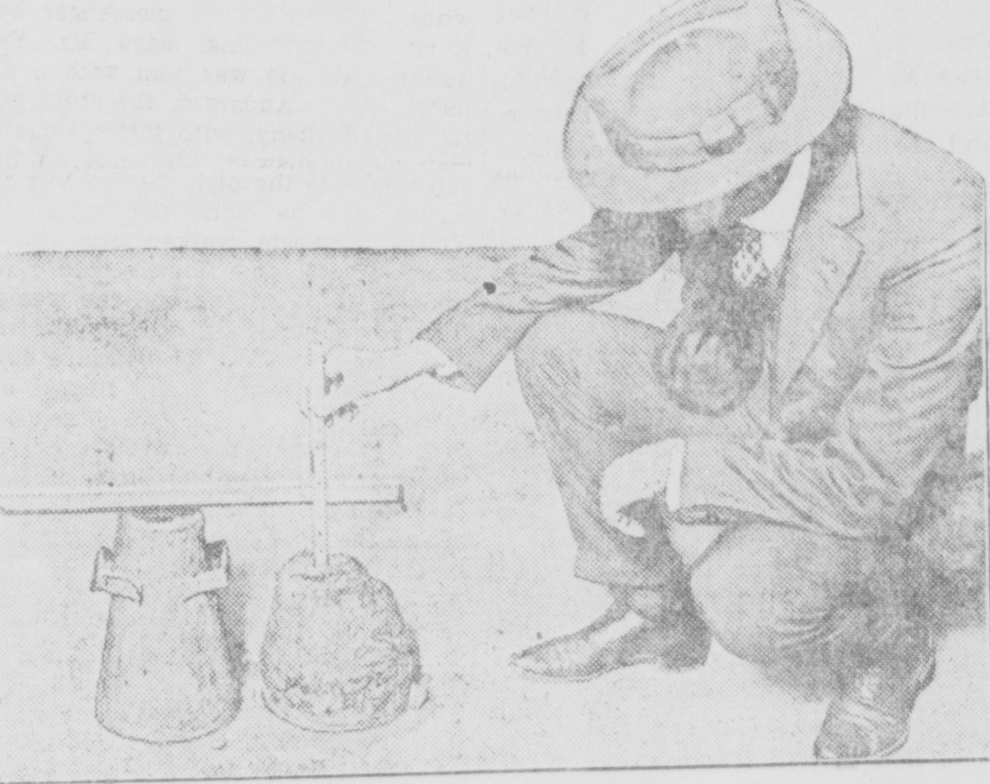

Slump Test Cone.

obtained, but a mixture of maximum strength would not be practicable for general construction purposes, as it would be too stiff to be worked. But a mixture of the stiffest consistency that can be worked will give 70 to 90 per cent of the maximum strength. The following table shows how too much or too little water detracts from the strength of concrete by wasting the strength of the cement:

10% too little water wastes	27% of the cement strength
6% " " "	10% " " "
7% " much " "	10% " " "
12% " " "	20% " " "
18% " " "	30% " " "
23% " " "	40% " " "
31% " " "	50% " " "
42% " " "	60% " " "
63% " " "	70% " " "
80% " " "	70% " " "

The right amount of water for cement mixtures of varying strengths is shown in the following table:

Cement	Sand	Gravel	Water Per
1 sack	1 1/2 cubic feet	cubic feet	Sack of Cement
1 "	1 1/2 "	3 "	5 1/2 to 5 3/4 gallons
1 "	2 "	4 "	6 1/2 " "
1 "	2 1/2 " "	5 " "	7 1/4 " 7 1/2 " "
1 "	3 " "	6 " "	8 1/4 " 8 1/2 " "

Using the Cone in Making the Slump Test.

Federal Grades for Alfalfa Suggested

Department of Agriculture Plans Are Outlined.

(Prepared by the United States Department of Agriculture.)

Federal grades for alfalfa are contemplated in investigational work now being done by the United States Department of Agriculture. Preliminary studies in co-operation with state experiment stations the past few months have included the collating of all data obtainable on the relative weight and feeding value of leaves and stems, relative feeding value of different cuttings at various stages of maturity, losses due to leaching, mechanical losses incurred in curing and the results of feeding experiments with stack sweated and stack burned alfalfa. Studies have also been made of the relative importance of alfalfa production in different parts of the United States and of the volume of receipts in various markets.

A number of bales of alfalfa have been obtained at various points in the West by the Kansas City office of the hay, feed and seed division of the department, and forwarded to the department's hay laboratory at Washington. Detailed studies of these bales are being made to determine statistical facts regarding color, texture, leafiness and foreign material as grading factors.

During the coming summer representatives of the department will visit the principal alfalfa markets and producing areas to make a thorough survey of existing grades and marketing practices to secure additional samples.

Persons interested in the grading of alfalfa, and who have constructive suggestions to offer, are invited to correspond with the Bureau of Agricultural Economics, United States Department of Agriculture, Washington, D. C.

Mass concrete, such as is used for heavy foundation work, should not slump to exceed 2 inches. Reinforced concrete, such as walls should not slump more than 6 inches; concrete roads when finished by hand should not have more than a 4-inch slump, while cement mortar for floor finishes should not have a greater slump than 2 inches.

Applying Slump Test.

To apply the slump test, estimate the minimum slump that you can use and still obtain the necessary consistency in the concrete. Test the batches frequently to check the slump and increase or decrease the quantity of water accordingly.

Consistency of concrete mixtures is easily measured and regulated by the slump test.

The only apparatus needed in making the slump test is a 5-inch pointed metal rod 21 inches long and a piece of sheet metal for a form, rolled into the shape of the frustum of a cone as shown in the accompanying diagram. The form can be cut from a piece of metal 15 inches wide, 26 inches long, and not less than 20 gauge. When finished it will be 12 inches high, 4 inches in diameter at the top and 8 inches in diameter at the bottom.

Fill this form with the concrete to be tested, placing it in layers about 4 inches deep and working it with the pointed metal rod. Each layer should be rodded exactly 30 times. Lift off the form immediately and measure the settlement or slump of the concrete.

Concrete, having a slump of 1/2 inch will contain only a little more water than necessary for maximum strength, but will be too stiff for most construction work. Concrete containing 10 per cent more water than is required for greatest strength will give a slump of 3 to 4 inches; 25 per cent excess water gives a slump of 6 to 7 inches; 50 per cent excess water gives a slump of 8 to 10 inches.

COUNTY AGENT

John D. Bragg, of Erie County, Em. loyed by Farm Bureau.

At a meeting of the executive committee of the Pickaway County Farm Bureau held Saturday evening, John D. Bragg, of Erie county, was hired as county agricultural agent to succeed Robert Wylie, resigned. Mr. Bragg comes most highly recommended by those for whom he has worked and he made a most favorable impression before the executive committee.

Mr. Bragg was born and reared on a farm in Erie county, has taught country school and is a graduate of the Ohio State university where he took a special training to prepare himself for county agent work, especially along the lines of cooperative marketing. He will begin his duties in Pickaway county about July 15. He is a son of State Senator John E. Bragg.

ILLNESS POSTPONES WEDDING.

Dr. Frank E. Stevenson, son of Mr. and Mrs. John C. Stevenson of Jackson township, is seriously ill at the Cincinnati General hospital with scarlet fever.

Dr. Stevenson was to have been married this week to Miss Neva Pauline Mote of Piqua. The marriage date was set for Thursday afternoon June 26, at four o'clock and the ceremony was to have been solemnized at Green street, Methodist church, Piqua. The invitations have been recalled.

K. K. K. KLONKLAVE

Will be held in Zwicker's grove in Circleville, Ohio, on July 4. The public, as well as all Klansman and their families are invited to come and spend the day and evening. Free admittance to all. You can bring your dinner and supper, or secure same on the grounds. There will be speaking on Americanism in the afternoon and Naturalization, and beautiful fire works in the evening. Come and enjoy the Fourth. 26June1 dJune27-30&july1.

ORIENT UNION.

The Orient W. C. T. U., met at the home of Mrs. Harriet Beavers on last Thursday afternoon, June 19. Mrs. Lucy B. Price, county president, gave an interesting and helpful talk which was greatly enjoyed by the union and all present. Dainty refreshments were served by the hostess.

ADVERTISED LETTERS

The following letters remained uncalled for in the Circleville, O., post-office for the week ending, Monday, June 23, 1924.

ARCH CULVERT

Half of Expense of Construction to be Paid to State of Ohio.

Director of Highways and Public Works L. A. Boulay is advertising for bids for the construction of a reinforced concrete arch bridge over Hargus creek on North Court street, this city at an estimated cost of \$41,910.80.

One-half of the cost of this improvement will be paid by the state of Ohio and this was made possible by the passage of Senator Chappellear's bill authorizing the state in proper cases to bear fifty per cent or less, of the expense of building bridges and culverts in municipalities.

The passage of this law was attended with more difficulties than any other enactment of the legislature in the last four years. In the 84th general assembly it was passed by both houses, but was vetoed by Governor Davis. In the senate the bill was passed over the governor's veto, but in the house it was buried in committee and could not be resurrected at that session.

In the 85th general assembly Senator Chappellear promptly reintroduced the bill and it passed both houses by a big vote and was approved by Governor Donahey and finally became a law.

The expenditure of all the energy, time and worry necessary to secure the enactment of this section is amply justified when we consider the fact that approximately \$20,000 is saved to the taxpayers of Pickaway county and the more important fact that residents to the north of Hargus creek are to be relieved of flood dangers.

Circleville, very properly, is the first municipality in the state to be benefited by the provisions of this act.

SOCIAL CALENDAR

One of the most enjoyable events of the season was the gathering of friends and former schoolmates at the beautiful country home of Mr. and Mrs. Harvey T. Hill, of near Darbyville, Sunday, June 22. All came with well filled baskets of good things to eat which was spread on long tables and was most thoroughly enjoyed at the noon hour. In the evening ice cream and cake were served, after which all departed for their homes declaring it a day of great pleasure and that the host and hostess were real entertainers and the Hill home an ideal place for such a gathering.

Ninety guests were present as follows: Mr. and Mrs. M. C. Edwards, Golda Blessing, Mr. and Mrs. Russell Hill and family, Mr. and Mrs. Pearl Gochenour, Mr. and Mrs. W. W. Bauhan Ernest Blessing, Mr. and Mrs. Brough Graham and family, of Derby; Mr. and Mrs. Scott Wehe and family and Mr. and Mrs. Ezra Hill, of Columbus; Mr. and Mrs. John Porter, Nellie Porter, Carl Porter, Mr. and Mrs. George Graham and family, Warner T. Graham and family, Mr. and Mrs. Clarence Porter, Miss Floral Holdren, of Mt. Sterling; Mr. and Mrs. Guy Gulick and family, Mr. and Mrs. Fred Thrallkill, of Commercial Point; Mr. and Mrs. Sherman Graham and family, Mr. and Mrs. Frank A. Beatty and family, of Orient; Mr. and Mrs. Millard Gulick and family, of Lancaster; Mr. and Mrs. C. E. Hill and daughter, Helen, of Williamsport; Mr. and Mrs. James Porter and family, of Five Points; Mr. and Mrs. John M. Davis and daughter Ruth, H. B. Darst, Miss Mary Darst, Mrs. Aldie Robey, Mr. and Mrs. Harry Hill and family, of Darbyville; Mr. and Mrs. Cecil Porter and Miss Elizabeth Dornisife, of Circleville.

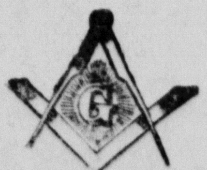

It was decided to make this reunion an annual affair to be held at the same place June 23, 1925, and it is hoped that those who were unable to attend Sunday can be present.

Miss Ann Carle, of Columbus, daughter of Mr. and Mrs. Theodore Carle of this city, and Mr. Harry Keeton, were married this afternoon at the Holy Name rectory, Columbus. The bride's parents, Mr. and Mrs. Theodore Carle, attended the wedding.

Unstoppable

PICKAWAY LODGE NO. 23. F. & A. M. Special Communication

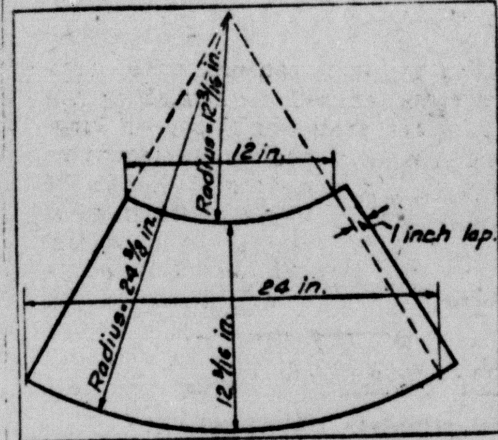

Wednesday evening, June 25, at 7:30 o'clock. Work in the M. M. degree. Brethren urged to be present. H. B. COLWELL, W. M. M. B. Trout, Secretary. 24June2.

Concrete Mixed With Accuracy

Strength of Material Is Determined by Amount of Water Employed.

Few persons realize, perhaps, how great an effect a difference in the proportion of water can have in the mixing of concrete. There are many who do not realize that for each pint of unnecessary water added to a concrete mixture the strength of the finished concrete may be decreased as much as if two pounds of portland cement had been left out.

The best concrete mixture is that which is as stiff as can be mixed conveniently. Even this will not be of the maximum strength which could be

Slump Test Cone.

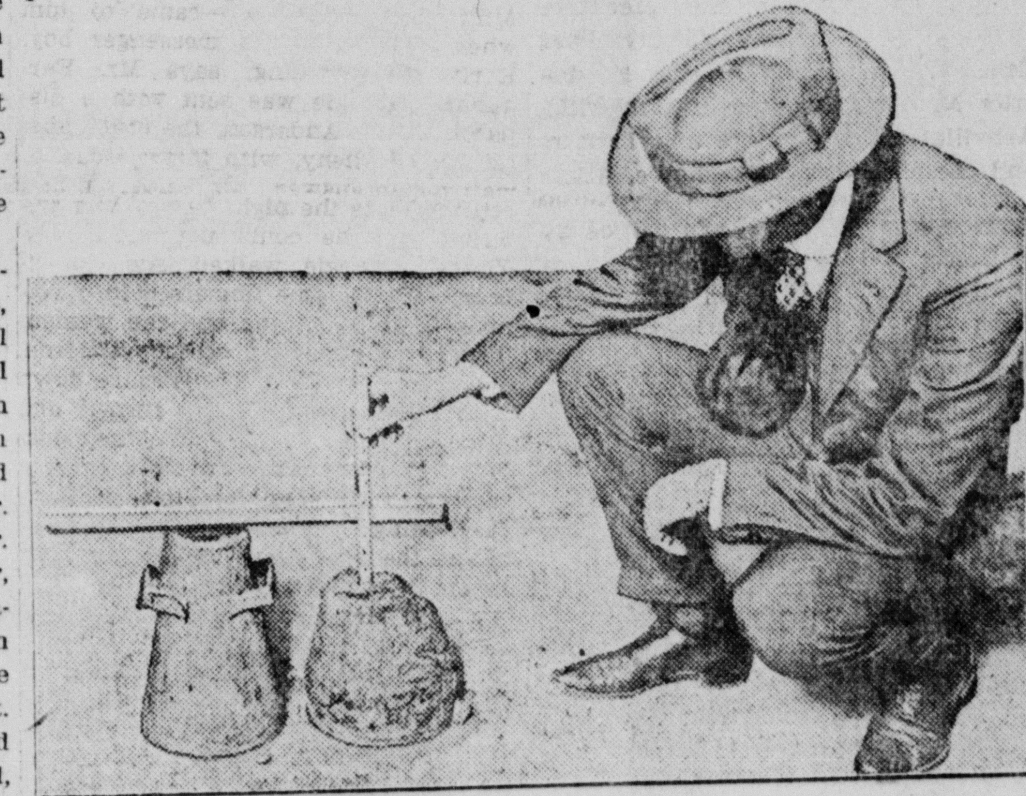

obtained, but a mixture of maximum strength would not be practicable for general construction purposes, as it would be too stiff to be worked. But a mixture of the stiffest consistency that can be worked will give 70 to 90 per cent of the maximum strength.

The following table shows how too much or too little water detracts from the strength of concrete by wasting the strength of the cement:

10% too little water wastes	27% of the cement strength
6% " "	10% " "
7% " "	10% " "
12% " "	20% " "
18% " "	30% " "
25% " "	40% " "
32% " "	50% " "
42% " "	60% " "
63% " "	70% " "
80% " "	70% " "

The right amount of water for cement mixtures of varying strengths is shown in the following table:

Cement	Sand	Gravel	Water Per Sack of Cement
1 sack	1½ cubic feet	2½ cubic feet	5 ½ to 6 ½ gallons
1 " "	1 " "	3 " "	5 ¼ " "
1 " "	2 " "	4 " "	6 " "
1 " "	2 " "	5 " "	7 ¼ " "
1 " "	2 ½ " "	6 " "	8 ¼ " "

Using the Cone in Making the Slump Test.

Federal Grades for Alfalfa Suggested

Department of Agriculture Plans Are Outlined.

(Prepared by the United States Department of Agriculture.)

Federal grades for alfalfa are contemplated in investigational work now being done by the United States Department of Agriculture. Preliminary studies in co-operation with state experiment stations the past few months have included the collating of all data obtainable on the relative weight and feeding value of leaves and stems, relative feeding value of different cuttings at various stages of maturity, losses due to leaching, mechanical losses incurred in curing and the results of feeding experiments with stack sweated and stack burned alfalfa. Studies have also been made of the relative importance of alfalfa production in different parts of the United States and of the volume of receipts in various markets.

A number of bales of alfalfa hay have been obtained at various points in the West by the Kansas City office of the hay, feed and seed division of the department, and forwarded to the department's hay laboratory at Washington. Detailed studies of these bales are being made to determine statistical facts regarding color, texture, leafiness and foreign material as grading factors.

During the coming summer representatives of the department will visit the principal alfalfa markets and producing areas to make a thorough survey of existing grades and marketing practices to secure additional samples.

Persons interested in the grading of alfalfa, and who have constructive suggestions to offer, are invited to correspond with the Bureau of Agricultural Economics, United States Department of Agriculture, Washington, D. C.

Mass concrete, such as is used for heavy foundation work, should not slump to exceed 2 inches. Reinforced concrete, such as walls should not slump more than 6 inches; concrete roads when finished by hand, should not have more than a 4-inch slump, while cement mortar for floor finishes should not have a greater slump than 2 inches.

Applying Slump Test.

To apply the slump test, estimate the minimum slump that you can use and still obtain the necessary consistency in the concrete. Test the batches frequently to check the slump and increase or decrease the quantity of water accordingly.

Consistency of concrete mixtures is easily measured and regulated by the slump test.

The only apparatus needed in making the slump test is a ½-inch pointed metal rod 21 inches long and a piece of sheet metal for a form, rolled into the shape of the frustum of a cone as shown in the accompanying diagram. The form can be cut from a piece of metal 15 inches wide, 20 inches long, and not less than 20 gauge. When finished it will be 12 inches high, 4 inches in diameter at the top and 8 inches in diameter at the bottom.

Fill this form with the concrete to be tested, placing it in layers about 4 inches deep and working it with the pointed metal rod. Each layer should be rodded exactly 30 times. Lift off the form immediately and measure the settlement or slump of the concrete.

Concrete having a slump of ½ inch will contain only a little more water than necessary for maximum strength, but will be too stiff for most construction work. Concrete containing 10 per cent more water than is required for greatest strength will give a slump of 3 to 4 inches; 25 per cent excess water gives a slump of 6 to 7 inches; 50 per cent excess water gives a slump of 8 to 10 inches.

COUNTY AGENT

John D. Bragg, of Erie County, Em, loyed by Farm Bureau.

At a meeting of the executive committee of the Pickaway County Farm bureau held Saturday evening, John D. Bragg, of Erie county, was hired as county agricultural agent to succeed Robert Wylie, resigned. Mr. Bragg comes most highly recommended by those for whom he has worked and he made a most favorable impression before the executive committee.

Mr. Bragg was born and reared on a farm in Erie county, has taught country school and is a graduate of the Ohio State university where he took a special training to prepare himself for county agent work, especially along the lines of cooperative marketing. He will begin his duties in Pickaway county about July 15. He is a son of State Senator John E. Bragg.

ILLNESS POSTPONES WEDDING.

Dr. Frank E. Stevenson, son of Mr. and Mrs. John C. Stevenson of Jackson township, is seriously ill at the Cincinnati General hospital with scarlet fever.

Dr. Stevenson was to have been married this week to Miss Neva Pauline Mote of Piqua. The marriage date was set for Thursday afternoon June 26, at four o'clock and the ceremony was to have been solemnized at Green street, Methodist church, Piqua. The invitations have been recalled.

K. K. K. KLONKLAWE

Will be held in Zwicker's grove in Circleville, Ohio, on July 4. The public, as well as all Klansman and their families are invited to come and spend the day and evening. Free admittance to all. You can bring your dinner and supper, or secure same on the grounds. There will be speaking on Americanism in the afternoon and Naturalization, and beautiful fire works in the evening. Come and enjoy the Fourth. 26June1 dJune27-30&july1.

ORIENT UNION.

The Orient W. C. T. U., met at the home of Mrs. Harriet Beavers on last Thursday afternoon, June 19. Mrs. Lucy B. Price, county president, gave an interesting and helpful talk which was greatly enjoyed by the union and all present. Dainty refreshments were served by the hostess.

ADVERTISED LETTERS

The following letters remained uncalled for in the Circleville, O., post-office for the week ending, Monday, June 23, 1924.

FICKARDT'S ROUP AND CHOLERA DROPS

On May 7, 1924, I called on Elmer Doner, Ashville, R. F. D. No. 1, and he told me the following:—

I bought four hundred (400) chicks of a hatchery and while there I bought some tablets to prevent disease or cure them if they were sick. Very soon the chicks began to die, I tried the tablets that I had obtained at the hatchery. I then bought other tablets liquids and powders, all nationally advertised remedies, but none of them did any good and my chicks kept on dying until I had lost 250.

A friend of mine told me of Fickardt's Roup and Cholera drops, at that time I had ten sick chicks in a pen separated from the well stock and I really considered them as good as dead.

I began to use Fickardt's Roup and Cholera drops with all my chicks, both well and sick. Two of the sick ones died, the other eight recovered and I have not lost any others since I began to use Fickardt's Roup and Cholera drops over a month ago.

I would have probably thought that the disease had run its course if it had not been for the fact that these that were sick recovered, but seeing the sick ones get well has convinced me that Fickardt's Roup and Cholera drops cured them.

Manufacturer.
Circleville, Ohio.

Vegetable Garden Is Essential on Farms

Farmers Should Plan Having Supply During Year.

Prepared by the United States Department of Agriculture.

While we are talking about the advantages of the kitchen garden in connection with the homes of those who live in the suburban districts, it must not be lost of the importance of good farm gardens. The United States census figures taken in 1910, showed that 78.9 per cent of all the farms in the United States have home gardens. This leads to the question, what did the other 21.1 per cent of the farm families have upon their tables. The answer would probably be mainly canned vegetables or no vegetables at all. It is safe to assume that the majority of these farm families who did not have a garden to fall back upon were often without vegetables on their tables. In view of the fact that vegetables furnish about four-fifths of the bulk of our ordinary diet, it would seem highly essential that every farm in the United States be well provided with garden facilities. When it comes to the matter of the actual value of the crops grown there is no comparison between general farm crops and those of the garden, as the average value of the garden crops is usually six to ten times that of a similar area in farm crops.

Not only should the farmers of the country give more attention to their home vegetable gardens in the spring, but they should so plan that a supply of vegetables will be maintained throughout the summer and plenty to can and store for winter.

Get Cows Into Condition by Liberal Corn Feeding

Cows that are milked down may be gotten in condition by feeding an extra amount of corn in the grain ration. A dry cow should always gain in weight and this gain can be made as quickly and cheaply with corn as with any other grain. A mixture of six parts of ground corn, two parts of ground oats or bran and one part of oil meal by weight is a very satisfactory mixture. Cotton seed should not be fed at this time owing to the lack of succulent feeds consumed. When the cow has gained as much weight as is desired, the corn should be replaced by bran and ground oats. At least ten days before the cow is due to freshen, bran, oats and oil meal should constitute the grain ration. Equal parts by weight of the first two with about one pound of oil meal per day forms a very satisfactory ration.

When the pregnant cow is within a few days of freshening, her grain ration should be considerably reduced. Bran mash is excellent at this time because of the laxative and cooling nature. If constipation is in evidence, one quart of raw linseed oil or one pound of epsom salts should be given. Many cases of milk fever could be avoided if proper care were given just previous to freshening. With the exception of a few hours before calving, some roughage such as clover, alfalfa or soy-bean hay should be provided in liberal quantities.

Watermelon Seed Needs

Best Kind of Attention

Many farmers fail to secure a good stand in their field of watermelons. Oftentimes they fail to secure as good a crop of commercial size melons as they should. Many melons show signs of disease. It is possible to protect against poor stands and poor crops if proper attention is given to seed as well as seed beds. Seed should be tested for germination. Then they should be disinfected. Specialists on truck diseases recommend the following: Take the amount of seed you have and soak them in a 1-to-1,000 solution of corrosive sublimate (bichloride of mercury) for ten minutes. Do not leave them in this solution longer than ten minutes.

Remove from the solution and wash thoroughly in three or four changes of clean fresh water to remove the disinfectant. The seed are now ready to plant.

This corrosive sublimate solution (1 to 1,000) is prepared by dissolving 1 tablet (which may be purchased at any drug store) in 1 pint of water. This amount is sufficient for a quarter of a pound of seed. Increase in this proportion for larger amounts.

Butter, Milk and Cheese

Selling at High Prices

Prices of dairy products did not suffer as much from the drastic deflation following the post-war period as did other farm products, says the United States Department of Agriculture. Butter, cheese, and milk have sold at prices remunerative to farmers. Butter is now higher than the general price level. Cheap feed in western butter districts, and high prices and some curtailment of production in milk districts, have enabled dairy farmers to weather the storm with less adversity than farmers producing commodities a part of which must be exported. Poultry and eggs have also continued on a fairly profitable basis.

Profits Don't Bother

Farmers who don't want to be bothered with keeping records and giving close attention to the details of farming as a business are not usually bothered with profits from the business.

Bicycles Great Peril to Pedestrians in Denmark

Denmark is a flat country, and therefore an incentive to bicycling. As soon as children are out of swaddling clothes in Denmark they are lashed to the handlebars of their parents' bicycles, or strapped in rumble seats, and taken on long trips. Thus bicycling becomes second nature to the Danes.

Danish cities encourage the use of bicycles by constructing special bicycle paths along the roadside so that the bicyclists may not be annoyed by traffic. This gives the bicyclists a false sense of security, so that the motorist in Copenhagen and other Danish towns is constantly being confronted by a serene bicyclist who sails with blissful recklessness directly into the motor-car's path.

The Danes are confirmed wabblers while bicycling, due to their habit of guiding the bicycles with only one hand, the other being used to lead dogs, hold large bundles, convey open umbrellas, valises or other impedimenta, or to restrain the tendency of skirts to rise to the riders' waists. The inventor who evolves a contrivance for holding down the skirts of lady bicyclists should reap a fortune in Copenhagen alone.

Everybody in Copenhagen rides to work on a bicycle every morning, so that the person who ventures on the streets afoot early in the morning or late in the afternoon is constantly in peril of being knocked down and having his features enmeshed in a sprocket wheel or tangled in a welter of wire spokes.—K. L. Roberts, in Saturday Evening Post.

George Meredith Ordered All Manuscripts Burned

George Meredith placed no value whatsoever on the manuscripts of his novels. Once when he said so to Miss Nichol she answered teasingly that it was mock modesty on his part to say such a thing.

To this Meredith merely gave her an instruction: to make a bonfire of manuscripts at the end of the garden. "And he was set on it, too," she told us.

"But," she pleaded, "can't I have some of them as keepsakes?"

"Yes," he answered carelessly, "take whichever you like." She selected several of the precious documents—single sheets on which he had written out his short poems. Miss Nichol led Mr. Brooks and me down into the vegetable garden, and there, a black little heap of ashes, lay all that remained of manuscripts worth who knows how much!—From "Forty Years in My Bookshop," by Walter S. Spencer.

Unkind

They were very much in love, but at last came the day when they had a bitter quarrel and they parted, each resolved never to see the other again as long as they lived.

Years passed, and they had almost forgotten that little love affair, when one night they came face to face with each other at a dance.

The man felt rather embarrassed, but he went eagerly up to her, nevertheless, and said softly:

"Why, Muriel!"

She looked at him indifferently. "Let me see," she said, calmly. "Was it you or your brother who used to be an old admirer of mine?"

He was snubbed, but he rose to the occasion.

"I really don't remember," he replied affably. "Probably my father."—London Answers.

He'd Done It Before

"Now dear," remarked Mrs. Subbub to her husband, as he was getting ready to go to the city, "I want you to do a little job for me while you are in town today. Will you go to Goose's and get me a house robe?"

"Very well, dear," he replied, and went on his way.

Entering the store some time later, Mr. Subbub gave his order.

"Here are some very pretty ones," said the salesgirl. "What color do you prefer?"

"Doesn't make any difference!" was the answer.

"Doesn't make any difference!" echoed the girl. "But don't you think your wife would like a certain color?"

"No, it doesn't make any difference what color or size I get," said Mr. Subbub, sadly. "I shall have to come back tomorrow and have it changed."

For Office Men

"Sedentary work," said the lecturer, "tends to lessen the endurance."

"In other words," butted in the smart student, "the more one sits the less one can stand."

"Exactly," retorted the lecturer, "and if one lies a great deal one's standing is lost completely."

Truthful

"You've been out with worse-looking fellows than I am, haven't you?" (No answer.)

"I say, you've been out with worse-looking fellows than I, haven't you?" "I heard you the first time. I was just trying to think."

His Excuse

A newboy took a handful of peanuts from a peanut stand and was arrested for it.

"Well, what are you here for?" the magistrate demanded.

"I don't know, your honor," the culprit replied. "Unless it's 'impersonating an officer.'"

Poison Ivy Plentiful

Widely distributed throughout the United States a species of poison ivy is found which climbs up the tall trunks of trees and in and out among the bushes along the road, luxuriating in fence corners and even thriving in wastes of sand where little other vegetation can exist.

Experience

Experience is a course of teaching that after a while has one hemmed in all round by verbotens.

FICKARDT'S ROUP AND CHOLERA DROPS

On May 7, 1924, I called on Elmer Doner, Ashville, R. F. D. No. 1, and he told me the following:—

I bought four hundred (400) chicks of a hatchery and while there I bought some tablets to prevent disease or cure them if they were sick. Very soon the chicks began to die. I tried the tablets that I had obtained at the hatchery. I then bought other tablets liquids and powders, all nationally advertised remedies, but none of them did any good and my chicks kept on dying until I had lost 250.

A friend of mine told me of Fickardt's Roup and Cholera drops, at that time I had ten sick chicks in a pen separated from the well stock and I really considered them as good as dead.

I began to use Fickardt's Roup and Cholera drops with all my chicks, both well and sick. Two of the sick ones died, the other eight recovered and I have not lost any others since I began to use Fickardt's Roup and Cholera drops over a month ago.

I would have probably thought that the disease had run its course if it had not been for the fact that these that were sick recovered, but seeing the sick ones get well has convinced me that Fickardt's Roup and Cholera drops cured them.

Vegetable Garden Is Essential on Farms

Farmers Should Plan Having Supply During Year.

(Prepared by the United States Department of Agriculture.)

While we are talking about the advantages of the kitchen garden in connection with the homes of those who live in the suburban districts slight must not be lost of the importance of good farm gardens. The United States census figures taken in 1919, showed that 78.9 per cent of all the farms in the United States have home gardens. This leads to the question, what did the other 21.1 per cent of the farm families have upon their tables. The answer would probably be mainly canned vegetables or no vegetables at all. It is safe to assume that the majority of these farm families who did not have a garden to fall back upon were often without vegetables on their tables. In view of the fact that vegetables furnish about four-fifths of the bulk of our ordinary diet, it would seem highly essential that every farm in the United States be well provided with garden facilities. When it comes to the matter of the actual value of the crops grown there is no comparison between general farm crops and those of the garden, as the average value of the garden crops is usually six to ten times that of a similar area in farm crops.

Not only should the farmers of the country give more attention to their home vegetable gardens in the spring, but they should so plan that a supply of vegetables will be maintained throughout the summer and plenty to can and store for winter.

Get Cows Into Condition by Liberal Corn Feeding

Cows that are milked down may be gotten in condition by feeding an extra amount of corn in the grain ration. A dry cow should always gain in weight and this gain can be made as quickly and cheaply with corn as with any other grain. A mixture of six parts of ground corn, two parts of ground oats or bran and one part of oil meal by weight is a very satisfactory mixture. Cotton seed should not be fed at this time owing to the lack of succulent feeds consumed. When the cow has gained as much weight as is desired, the corn should be replaced by bran and ground oats. At least ten days before the cow is due to freshen, bran, oats and oil meal should constitute the grain ration. Equal parts by weight of the first two with about one pound of oil meal per day forms a very satisfactory ration.

When the pregnant cow is within a few days of freshening, her grain ration should be considerably reduced. Bran mashes are excellent at this time because of the laxative and cooling nature. If constipation is in evidence, one quart of raw linseed oil or one pound of epsom salts should be given. Many cases of milk fever could be avoided if proper care were given just previous to freshening. With the exception of a few hours before calving, some roughage such as clover, alfalfa or soy-bean hay should be provided in liberal quantities.

Watermelon Seed Needs Best Kind of Attention

Many farmers fail to secure a good stand in their field of watermelons. Oftentimes they fail to secure as good a crop of commercial size melons as they should. Many melons show signs of disease. It is possible to protect against poor stands and poor crops if proper attention is given to seed as well as seed beds. Seed should be tested for germination. Then they should be disinfected. Specialists on truck diseases recommend the following: Take the amount of seed you have and soak them in a 1-to-1,000 solution of corrosive sublimate (bichloride of mercury) for ten minutes. Do not leave them in this solution longer than ten minutes.

Remove from the solution and wash thoroughly in three or four changes of clean fresh water to remove the disinfectant. The seed are now ready to plant.

This corrosive sublimate solution (1 to 1,000) is prepared by dissolving 1 tablet (which may be purchased at any drug store) in 1 pint of water. This amount is sufficient for a quarter of a pound of seed. Increase in this proportion for larger amounts.

Butter, Milk and Cheese Selling at High Prices

Prices of dairy products did not suffer as much from the drastic deflation following the post-war period as did other farm products, says the United States Department of Agriculture. Butter, cheese, and milk have sold at prices remunerative to farmers. Butter is now higher than the general price level. Cheap feed in western butter districts, and high prices and some curtailment of production in milk districts, have enabled dairy farmers to weather the storm with less adversity than farmers producing commodities a part of which must be exported. Poultry and eggs have also continued on a fairly profitable basis.

Profits Don't Bother

Farmers who don't want to be bothered with keeping records and giving close attention to the details of farming as a business are not usually bothered with profits from the business.

Bicycles Great Peril to Pedestrians in Denmark

Denmark is a flat country, and therefore an incentive to bicycling. As soon as children are out of swaddling clothes in Denmark they are lashed to the handlebars of their parents' bicycles, or strapped in rumble seats, and taken on long trips. Thus bicycling becomes second nature to the Danes. Danish cities encourage the use of bicycles by constructing special bicycle paths along the roadside so that the bicyclists may not be annoyed by traffic. This gives the bicyclists a false sense of security, so that the motorist in Copenhagen and other Danish towns is constantly being confronted by a serene bicyclist who sails with blissful recklessness directly into the motor-car's path.

The Danes are confirmed wabblers while bicycling, due to their habit of guiding the bicycles with only one hand, the other being used to lead dogs, hold large bundles, convey open umbrellas, valises or other impedimenta, or to restrain the tendency of skirts to rise to the riders' waists. The inventor who evolves a contrivance for holding down the skirts of lady bicyclists should reap a fortune in Copenhagen alone.

Everybody in Copenhagen rides to work on a bicycle every morning, so that the person who ventures on the streets afoot early in the morning or late in the afternoon is constantly in peril of being knocked down and having his features enmeshed in a sprocket wheel or tangled in a welter of wire spokes.—K. L. Roberts, in Saturday Evening Post.

George Meredith Ordered All Manuscripts Burned

George Meredith placed no value whatsoever on the manuscripts of his novels. Once when he said so to Miss Nichol she answered teasingly that it was mock modesty on his part to say such a thing.

To this Meredith merely gave her an instruction: to make a bonfire of manuscripts at the end of the garden. "And he was set on it, too," she told us.

"But," she pleaded, "can't I have some of them as keepsakes?" "Yes," he answered carelessly, "take whichever you like." She selected several of the precious documents—single sheets on which he had written out his short poems. Miss Nichol led Mr. Brooks and me down into the vegetable garden, and there, a black little heap of ashes, lay all that remained of manuscripts worth who knows how much!—From "Forty Years in My Bookshop," by Walter S. Spencer.

Unkind

They were very much in love, but at last came the day when they had a bitter quarrel and they parted, each resolved never to see the other again as long as they lived.

Years passed, and they had almost forgotten that little love affair, when one night they came face to face with each other at a dance.

The man felt rather embarrassed, but he went eagerly up to her, nevertheless, and said softly:

"Why, Muriel!"

She looked at him indifferently. "Let me see," she said, calmly. "Was it you or your brother who used to be an old admirer of mine?"

He was snubbed, but he rose to the occasion.

"I really don't remember," he replied affably. "Probably my father."—London Answers.

He'd Done It Before

"Now dear," remarked Mrs. Subbub to her husband, as he was getting ready to go to the city. "I want you to do a little job for me while you are in town today. Will you go to Goose's and get me a house robe?"

"Very well, dear," he replied, and went on his way.

Entering the store some time later, Mr. Subbub gave his order.

"Here are some very pretty ones," said the salesgirl. "What color do you prefer?"

"Doesn't make any difference?" was the answer.

"Doesn't make any difference?" echoed the girl. "But don't you think your wife would like a certain color?"

"No, it doesn't make any difference what color or size I get," said Mr. Subbub, sadly. "I shall have to come back tomorrow and have it changed."

For Office Men

"Sedentary work," said the lecturer, "tends to lessen the endurance."

"In other words," butted in the smart student, "the more one sits the less one can stand."

"Exactly," retorted the lecturer, "and if one lies a great deal one's standing is lost completely."

Truthful

"You've been out with worse-looking fellows than I am, haven't you?" (No answer.)

"I say, you've been out with worse-looking fellows than I, haven't you?" "I heard you the first time. I was just trying to think."

His Excuse

A newsboy took a handful of peanuts from a peanut stand and was arrested for it.

"Well, what are you here for?" the magistrate demanded.

"I don't know, your honor," the culprit replied, "unless it's 'impersonating an officer.'"

Poison Ivy Plentiful

Widely distributed throughout the United States a species of poison ivy is found which climbs up the tall trunks of trees and in and out among the bushes along the road, luxuriating in fence corners and even thriving in wastes of sand where little other vegetation can exist.

Experience

Experience is a course of teaching that after a while has one hemmed in all round by verbotens.

\$1.50

No more after these are sold. Compare them with any in the city for \$2.00.

MACK PARRETT

Silver and Gold

The crescent of the little beach was like a silver bow. Far out over the glistening waters stretched the gleaming pathway of the moon. The tide was on the turn and each succeeding wave tossed glittering jewels nearer to our feet. The moon had lightly touched the sands and transformed them to grains of the purest silver; she had changed a prosaic rowboat to a ship of dreams. Above us the depth of the inky sky was thickly inlaid with golden stars. Other stars, nearer the horizon, were caught and held by the sea as, huddled close together, they vainly strove to vie with their loftier brethren. The little ripples seemed to be sharing some delightful secret. We could hear them whispering together about it, and when they met and played among the rocks they chuckled gleefully. Who cares for the silver and gold of merchandise, with its clink and jangle? Richer far, is he that holds the memory of one precious hour when words were not spoken, but felt, when silence brooded, fraught with meaning, and the soft, sweet chuckles of the waves were the only voices. An hour all inwrought with nature's silver and gold.

In Between

When do impolite children become polite on the way to growing up? The change takes place somewhere.

Thrilling Adventure at the Witching Hour

The clock on the dining-room mantelpiece had just struck midnight. As the last stroke merged into silence the watcher looked up from his meal and listened intently. The fire had died down almost to extinction, and the full moon, shining through the French windows, threw eerie shadows across the deserted room.

A slight sound, hardly discernible to ordinary ears, came from the outside of the window, as if something were scraping on the stonework underneath the window.

Instantly the watcher was on his feet, crouching in the shadow of a big armchair, his head on one side, every sense on the alert.

While he was listening thus the moon disappeared behind a cloud. When it appeared again a shadow was silhouetted against the window; and even as the watcher, his heart palpitating, decried the mysterious appearance, the window slowly began to open noiselessly. Faintly, almost imperceptibly, the opening grew larger, a black shadow silently protruded itself, dropped quietly to the ground, and faded into the darkness of the recess.

There followed a deathly silence, broken only by the faint sound of trees swaying in the night breeze. Suddenly a black shadow detached itself from the darkness around the walls and steadily crossed the path of moonlight near the fireplace.

A slight noise caused the watcher to turn. As he did so he became aware of two shining green lights glaring uncannily at him, about a foot away, from out of the darkness. With a despairing shriek of terror he fled for the sideboard. The black shadow sprang. A brief scuffle, a sharp scream of pain—and silence.

Five minutes later the black tomcat left by the way he had entered, the still warm body of the newly-slain mouse in his jaws.—London Answers.

Stone-Age Houses Are Rebuilt on Lake Shore

All visitors to the Lake of Constance in Baden know that on its banks may be found remains of so-called lake dwellings, prehistoric habitations built on a platform supported on piles. In Switzerland and in Austria, where pile dwellings of the same kind have also been discovered, the first reconstruction of these ancient villages was tried. At present reconstructions of a similar kind are being made at Unter-Uhlingen on the Lake of Constance.

Last year a family house and a "men's house" were erected on the ancient piles. Both are imitations of the oldest types of lake dwellings belonging to the Stone age. A third house imitating the later type of the Bronze age is to be built next.

These dwellings are furnished with the various implements and articles of daily use found in the neighborhood and are instructive prehistoric museums on a small scale. It is now planned to reconstruct a cluster of dwellings showing almost a village formation on the Swiss bank of the lake. Ermeningen.—Christian Science Monitor.

Screws Used in Watches

Certain of the screws used in making watches are so tiny that 100,000 of them could be placed in a woman's thimble. These screws are cut by a machine from steel wire that is only four-one-thousandths of an inch in diameter, and as the chips fall it looks as though the operator were simply shaving the wire for his own amusement. No screws can be seen, and yet a screw is made at every third operation. Studied through a microscope, it will be seen that each little finished screw is evenly grooved at the proportion of 200 threads to the inch. It is estimated that a single machine turns out about a million a month. They are polished in wholesale fashion—ten thousand at a time. They would never be finished taken separately.

Modern Duelling

Two men had planted themselves in a field and were about to fight a duel with pistols when the farmer dashed up.

"No duelling here," he declared. "I don't suppose either of you can shoot straight."

They admitted the truth of this. "Then your shots are apt to go wide and hurt somebody."

"Well, where can we fight? Got another field?"

"Go over yonder to the railroad," suggested the farmer. "What you want is a tunnel."

His Twin

Two Irishmen met in the street one day.

"Sure I met a man last week, and, I said, I'd have sworn it was your self."

"And wasn't it?" asked the other.

"Never a bit," replied Pat. "But he was your very image, barrin' he was a thrifle gray. I suppose, now, ye haven't such a thing as a twin brother a few years older than yourself?"

Fair Question

Barrister (to flustered witness)—Now, sir, did you or did you not on the late in question, or at any other time, say to the defendant or any one else that the statement imputed to you and denied by the plaintiff was a matter of no moment or otherwise—answer me, yes or no? Bewildered Witness—Yes or no hat?—Stray Stories.

Fashion Changes in Paris Frocks

New Ideas Are Presented in Modes Offered by Leading Designers.

American women are timid about adopting any radically new ideas in the matter of dress. Such is the opinion given recently by a famous couturier of Paris. But he said also that she will go far in expressing the latest style, once her approval is won. This, after all, is the view of only one authority on the subject, and may be taken for whatever it is worth, observes a fashion correspondent in the New York Times.

It is quite certain that the American woman has demonstrated to the world that she has a mind and a standard of her own, and an individuality which she desires to express. Moreover, she has given such evidence of artistic ability in designing her clothes and such taste and distinction in wearing them that the creators of fashions know it is well worth their while to work for her favor.

There was a time when the American woman may have merited the comment that she was like one of a flock of sheep, following the leader wherever he led. But now she knows what she wants and will wear what she chooses, and she does it so well that she is herself a creator of styles.

Changes in fashions are interesting, but a lazy and perhaps fagged world finds them taxing. Unless one is prepared to accept whatever the dress-maker recommends, the new ideas must be carefully thought out and the decision must have concentrated attention, and all of this demands time.

Occasionally there are modes that become established and find such favor that they endure, season after season, and are reluctantly relinquished. These have been many in the last three or four years. The slipover, the one-piece gown, the tunic, the belted gown that requires no corset to give it form—all of these, making for comfort, have been beloved by women of all weights and ages. Then came the soft materials, the graceful draperies that lacked any suggestion of whalebone or crinoline, and in their floating loveliness were so flattering that they will long be with us, differing little. A woman is not eager to change from a becoming style. If it happens to suit her type it is doubly valued.

Introduces New Features.

Yet it is not after this manner that the Old World moves, and the changes must come. The ideas offered in advance are somewhat incidental and may not be regarded as establishing anything wholly different. They may vary only slightly the styles that have been acceptable for a season or more. Those now shown are modifications in models that will serve to introduce some new features in gowns appropriate for either late winter or early spring.

The evolution of certain ideas is worth studying. The tunic in some is obviously lengthened with a flounce, plaited, straight or circular. In others it is shortened to the line of a hip-length blouse. Jenny has done an at-

Tiered Effect Is Varied in But Partially Circling Skirt.

tractive, practical frock of this description that will be popular with young women of slender figure, the model being carried out in crepe, plain for the skirt, which is in two tiers, and figured for the tunic blouse, which is loosely belted with a narrow strap of the plain goods, that also forms cuffs, elbow depth.

One of Molyneux' latest models is carried out in broadcloth, now seldom seen, the skirt being plain and narrow, the tunic plain and straight, with bateau neck and long sleeves, unconfined at the wrist. The skirt of the blouse is open several inches at the front, and extends to the knees. A piece of ermine ornaments the belt as a buckle and trims the neck and sleeves. Brown satin is the material used by Premet in a youthful model shown with a tunic blouse and skirt, made with one deep flounce, the hip belt being embroidered in silk floss of the same color, and the cuffs and collar being of cream lace.

It is a fancy of Premet's to employ the tubelike gown and to build upon it flounces or bands, a favorite design

having a flounce, hip deep, sometimes plaited, often gathered full, and held tight to the figure at the top. From Martial et Armand are some charming gowns of this character, each made with the blouse absolutely straight to a point far below the hips, with shallow open neck, and sleeveless, or with very short sleeves. Upon each of these foundations a flounce or flounces is built.

One smart model has three straight full ruffles of the material trimming the gown to a point between knee and waist. These gowns are invariably made of crepe de chine, crepe marocain or satin and are equally serviceable for afternoon wear with an outer wrap or fur piece, or for any daytime occasion in a warm climate.

Deep Flounce Is Used.

Renee is another Parisian authority from whom come a number of attractive midseason frocks in which the deep flounce is featured, usually in narrow plaits. One jeune fille model is established in dark blue satin crepe, plaited from collar to hem, the tunic being slightly bloused and belted in a deep waistline.

Patou elects to use the circular flounce, whether in one deep ruffle or in a number, and sends to a New York

Model From Paris Shows New Choker Collar, Modish Sleeve.

house a pretty frock that will illustrate the idea in several variations. It is of gray crepe marocain, the skirt narrow and tubelike, and trimmed with bias ruffles to the waist, which is plain and loosely bloused. A straight loose coat of the same material is trimmed about the bottom, with two of the ruffles, which also finish the long sleeves of easy width.

Premet, who is showing in models so many raffled effects, has also several in which a slight change in the drapery varies the line of the gown, and this is done with equal charm in evening and daytime frocks. One especially smart, simple model is in one piece, the skirt being drawn about the figure from the back toward the front at one side, where it is lifted and held with an ornament, to fall in a slight cascade. A soft turnover collar finishes the gown at the throat, and the sleeves are tight and long, extending well over the hand.

Simplicity is the keynote of all the gowns shown by French artists, and even those elaborated to the extent of flounces and drapery are distinguished by the one feature, whatever it may be; for trimming of any sort is used with much restraint. Among the well-known designers, Cheruit shows extreme simplicity, almost severity, depending upon some startling note to mark distinction, especially in evening gowns. From this house have come several designs showing radical changes in outline, some quite sensational. It is Cheruit who most daringly offers the pannier or extended hip trimming, and drapes the material low on the frock, down from the knee.

Things More Ornate.

Lanvin goes in for things somewhat more ornate, and does with equal success the period gown. Few of the models from this artist have the perfectly plain skirt, and in almost all of them the material is draped and some embroidery is introduced. Among Lanvin's evening dresses the most conspicuously successful model is the wide-skirted "robe de style," with the little tight basque-bodice which has so securely captured the fancy of fashionably gowned women and which Lanvin has expressed elaborately and with more cachet than any other couturiere.

These gowns of quaint style have formed the one contrasting note to the accepted conventional modes, and they promise to have a lasting vogue.

The universal popularity of the topcoat, an outer wrap of some sort to be worn with every type of gown but the suit, has tended to lighten the weight of the dress itself, and few models are shown in any material heavier than satin, crepe or one of the new silks.

For the exceptional one-piece gown kasha cloth is the favorite, with which is usually worn the chic fur jacquette or as the season advances a neckpiece of fur or any of the new fashionable scarfs. In colors, brown has become almost as staple as black, and is shown in many lovely shades, from seal to havana. With it are worn shoes and stockings in soft beige or tan.

To Honor Pasteur

The French senate has appropriated 2,000,000 francs for the celebration of the one hundredth anniversary of the birth of Louis Pasteur, the great bacteriologist.

New Scale Invented

Electrically-operated scales have been invented that prevent more than a desired amount of dry groceries being poured from bins into receptacles.

Deserves a Medal

Hall Racke deserves the medaille humoresque (ain't that right?). He wrote a light and amusing piece about the rat without using the word "rodent" anywhere.

Stray Bit of Wisdom

Love is ever busy with his shuttle, is ever weaving into life's dull warp bright gorgeous flowers and scenes Arcadian.—Longfellow.

The Real Character

Of a Financial Institution Results From Constant, Faithful Contacts With Customers Over a Long Period of Time.

This character forms slowly. It takes a long time to build a good name.

The officers and directors of The Buckeye have put real character into it. For many years the people of Columbus and Central Ohio have relied upon us and have known no disappointment.

HENN BROS. MEAT MARKET

Yes, we have a Jim Vaughan machine, On this we cut our meat, fat or lean. We cut steaks, roasts, or chops, it can be seen, No splinters or slivers which you usually get We cut it by machine you bet.

We cut it nice and even It can hardly be believ'in'. But this machine just cuts it through, Just come and see what it will do. We cut our meats real nice for you.

Silver and Gold

The crescent of the little beach was like a silver bow. Far out over the glistening waters stretched the gleaming pathway of the moon. The tide was on the turn and each succeeding wave tossed glittering jewels nearer to our feet. The moon had lightly touched the sands and transformed them to grains of the purest silver; she had changed a prosaic rowboat to a ship of dreams. Above us the depth of the inky sky was thickly inlaid with golden stars. Other stars, nearer the horizon, were caught and held by the sea as, huddled close together, they vainly strove to vie with their loftier brethren. The little ripples seemed to be sharing some delightful secret. We could hear them whispering together about it, and when they met and played among the rocks they chuckled gleefully. Who cares for the silver and gold of merchandise, with its clink and jangle? Richer far, is he that holds the memory of one precious hour when words were not spoken, but felt, when silence brooded, fraught with meaning, and the soft, sweet chuckles of the waves were the only voices. An hour all inwrought with nature's silver and gold.

In Between

When do impolite children become polite on the way to growing up? The change takes place somewhere.

Thrilling Adventure at the Witching Hour

The clock on the dining-room mantelpiece had just struck midnight. As the last stroke merged into silence the watcher looked up from his meal and listened intently. The fire had died down almost to extinction, and the full moon, shining through the French windows, threw eerie shadows across the deserted room.

A slight sound, hardly discernible to ordinary ears, came from the outside of the window, as if something were scraping on the stonework underneath the window.

Instantly the watcher was on his feet, crouching in the shadow of a big armchair, his head on one side, every sense on the alert.

While he was listening thus the moon disappeared behind a cloud. When it appeared again a shadow was silhouetted against the window; and even as the watcher, his heart palpitating, decried the mysterious appearance, the window slowly began to open noiselessly. Faintly, almost imperceptibly, the opening grew larger, a black shadow silently protruded itself, dropped quietly to the ground, and faded into the darkness of the recess.

There followed a deathly silence, broken only by the faint sound of trees swaying in the night breeze. Suddenly a black shadow detached itself from the darkness around the walls and steadily crossed the path of moonlight near the fireplace.

A slight noise caused the watcher to turn. As he did so he became aware of two shining green lights glaring uncannily at him, about a foot away, from out of the darkness. With a despairing shriek of terror he fled for the sideboard. The black shadow sprang. A brief scuffle, a sharp scream of pain—and silence.

Five minutes later the black tumbler left by the way he had entered, the still warm body of the newly-slain mouse in his jaws.—London Answers.

Stone-Age Houses Are Rebuilt on Lake Shore

All visitors to the Lake of Constance in Baden know that on its banks may be found remains of so-called lake dwellings, prehistoric habitations built on a platform supported on piles. In Switzerland and in Austria, where pile dwellings of the same kind have also been discovered, the first reconstruction of these ancient villages was tried. At present reconstructions of a similar kind are being made at Unter-Uhlingen on the Lake of Constance.

Last year a family house and a "men's house" were erected on the ancient piles. Both are imitations of the oldest types of lake dwellings belonging to the Stone Age. A third house imitating the later type of the Bronze Age is to be built next.

These dwellings are furnished with the various implements and articles of daily use found in the neighborhood and are instructive prehistoric museums on a small scale. It is now planned to reconstruct a cluster of dwellings showing almost a village formation on the Swiss bank of the lake. Ermeningen.—Christian Science Monitor.

Screws Used in Watches

Certain of the screws used in making watches are so tiny that 100,000 of them could be placed in a woman's thumbnail. These screws are cut by a machine from steel wire that is only four-one-thousandths of an inch in diameter, and as the chips fall it looks as though the operator were simply shaving the wire for his own amusement. No screws can be seen, and yet a screw is made at every third operation. Studied through a microscope, it will be seen that each little finished screw is evenly grooved at the proportion of 200 threads to the inch. It is estimated that a single machine turns out about a million a month. They are polished in wholesale fashion—ten thousand at a time. They would never be finished taken separately.

Modern Duelling

Two men had planted themselves in a field and were about to fight a duel with pistols when the farmer dashed up.

"No duelling here," he declared. "I don't suppose either of you can shoot straight."

They admitted the truth of this. "Then your shots are apt to go wide and hurt somebody."

"Well, where can we fight? Got another field?"

"Go over yonder to the railroad," suggested the farmer. "What you want is a tunnel."

His Twin

Two Irishmen met in the street one day.

"Sure I met a man last week, and, I bet, I'd have sworn it was your self."

"And wasn't it?" asked the other.

"Never a bit," replied Pat. "But he was your very image, barrin' he was a thrille gray. I suppose, now, ye haven't such a thing as a twin brother a few years older than yourself?"

Fair Question

Barrister (to flustered witness)—Now, sir, did you or did you not on the late in question, or at any other time, say to the defendant or any one else that the statement imputed to you and denied by the plaintiff was a matter of no moment or otherwise—answer me, yes or no?

Bewildered Witness—Yes or no what?—Story Stories.

Fashion Changes in Paris Frocks

New Ideas Are Presented in Modes Offered by Leading Designers.

American women are timid about adopting any radically new ideas in the matter of dress. Such is the opinion given recently by a famous couturier of Paris. But he said also that she will go far in expressing the latest style, once her approval is won. This, after all, is the view of only one authority on the subject, and may be taken for whatever it is worth, observes a fashion correspondent in the New York Times.

It is quite certain that the American woman has demonstrated to the world that she has a mind and a standard of her own, and an individuality which she desires to express. Moreover, she has given such evidence of artistic ability in designing her clothes and such taste and distinction in wearing them that the creators of fashions know it is well worth their while to work for her favor.

There was a time when the American woman may have merited the comment that she was like one of a flock of sheep, following the leader wherever he led. But now she knows what she wants and will wear what she chooses, and she does it so well that she is herself a creator of styles.

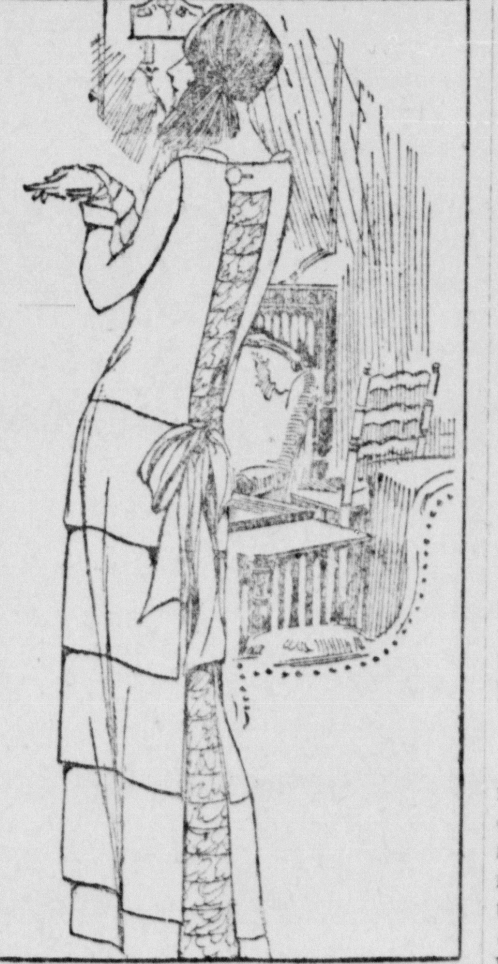

Changes in fashions are interesting, but a lazy and perhaps fagged world finds them taxing. Unless one is prepared to accept whatever the dress-maker recommends, the new ideas must be carefully thought out and the decision must have concentrated attention, and all of this demands time.

Occasionally there are modes that become established and find such favor that they endure, season after season, and are reluctantly relinquished. These have been many in the last three or four years. The slipover, the one-piece gown, the tunic, the belted gown that requires no corset to give it form—all of these, making for comfort, have been beloved by women of all weights and ages. Then came the soft materials, the graceful draperies that lacked any suggestion of whalebone or corset, and in their floating loveliness were so flattering that they will long be with us, differing little. A woman is not eager to change from a becoming style. If it happens to suit her type it is doubly valued.

Introduces New Features.

Yet it is not after this manner that the Old World moves, and the changes must come. The ideas offered in advance are somewhat incidental and may not be regarded as establishing anything wholly different. They may vary only slightly the styles that have been acceptable for a season or more. Those now shown are modifications in models that will serve to introduce some new features in gowns appropriate for either late winter or early spring.

The evolution of certain ideas is worth studying. The tunic in some is obviously lengthened with a flounce, plaited, straight or circular. In others it is shortened to the line of a hip-length blouse. Jenny has done an at-

Tiered Effect Is Varied in But Partially Circling Skirt.

tractive, practical frock of this description that will be popular with young women of slender figure, the model being carried out in crepe, plain for the skirt, which is in two tiers, and figured for the tunic blouse, which is loosely belted with a narrow strap of the plain goods, that also forms cuffs, elbow depth.

One of Molyneux's latest models is carried out in broadcloth, now seldom seen, the skirt being plain and narrow, the tunic plain and straight, with bateau neck and long sleeves, unconfined at the wrist. The skirt of the blouse is open several inches at the front, and extends to the knees. A piece of ermine ornaments the belt as a buckle and trims the neck and sleeves. Brown satin is the material used by Premet in a youthful model shown with a tunic blouse and skirt, made with one deep flounce, the hip belt being embroidered in silk floss of the same color, and the cuffs and collar being of cream lace.

It is a fancy of Premet's to employ the tubelike gown and to build upon it flounces or bands, a favorite design

having a flounce, hip deep, sometimes plaited, often gathered full, and held tight to the figure at the top. From Martial et Armand are some charming gowns of this character, each made with the blouse absolutely straight to a point far below the hips, with shallow open neck, and sleeveless, or with very short sleeves. Upon each of these foundations a flounce or flounces is built.

One smart model has three straight full ruffles of the material trimming the gown to a point between knee and waist. These gowns are invariably made of crepe de chine, crepe marocain or satin and are equally serviceable for afternoon wear with an outer wrap or fur piece, or for any daytime occasion in a warm climate.

Deep Flounce Is Used.

Renee is another Parisian authority from whom come a number of attractive midseason frocks in which the deep flounce is featured, usually in narrow plaits. One jeune fille model is established in dark blue satin crepe, plaited from collar to hem, the tunic being slightly bloused and belted in a deep waistline.

Patou elects to use the circular flounce, whether in one deep ruffle or in a number, and sends to a New York

Model From Paris Shows New Choker Collar, Modish Sleeve.

house a pretty frock that will illustrate the idea in several variations. It is of gray crepe marocain, the skirt narrow and tubelike, and trimmed with bias ruffles to the waist, which is plain and loosely bloused. A straight loose coat of the same material is trimmed about the bottom, with two of the ruffles, which also finish the long sleeves of easy width.

Premet, who is showing in models so many ruffled effects, has also several in which a slight change in the drapery varies the line of the gown, and this is done with equal charm in evening and daytime frocks. One especially smart, simple model is in one piece, the skirt being drawn about the figure from the back toward the front at one side, where it is lifted and held with an ornament, to fall in a slight cascade. A soft turnover collar finishes the gown at the throat, and the sleeves are tight and long, extending well over the hand.

Simplicity is the keynote of all the gowns shown by French artists, and even those elaborated to the extent of flounces and drapery are distinguished by the one feature, whatever it may be; for trimming of any sort is used with much restraint. Among the well-known designers, Cheruit shows extreme simplicity, almost severity, depending upon some startling note to mark distinction, especially in evening gowns. From this house have come several designs showing radical changes in outline, some quite sensational. It is Cheruit who most daringly offers the pannier or extended hip trimming, and drapes the material low on the frock, down from the knee.

Things More Ornate.

Lanvin goes in for things somewhat more ornate, and does with equal success the period gown. Few of the models from this artist have the perfectly plain skirt, and in almost all of them the material is draped and some embroidery is introduced. Among Lanvin's evening dresses the most conspicuously successful model is the wide-skirted "robe de style," with the little tight basque-bodice which has so securely captured the fancy of fashionably gowned women and which Lanvin has expressed elaborately and with more cachet than any other couturiere.

These gowns of quaint style have formed the one contrasting note to the accepted conventional modes, and they promise to have a lasting vogue.

The universal popularity of the topcoat, an outer wrap of some sort to be worn with every type of gown but the suit, has tended to lighten the weight of the dress itself, and few models are shown in any material heavier than satin, crepe or one of the new silks.

For the exceptional one-piece gown kasha cloth is the favorite, with which is usually worn the chic fur jacquette or as the season advances a neckpiece of fur or any of the new fashionable scarfs. In colors, brown has become almost as staple as black, and is shown in many lovely shades, from seal to havana. With it are worn shoes and stockings in soft beige or tan.

SEDAN AUTOMOBILES USED ON RAILROAD

Here is the latest in Sedan automobiles being used on the Southern railroad at Cincinnati, Ohio, to replace the old type of hand-car used for some time. Possibly the laborers, after a hard day with the pick and shovel might resent this intruder with its speed and luxurious ease of interior? Possibly.

ADJUSTMENT OF LIGHTS ON AUTO

Mistaken Idea That Driver Is Being Courteous to Others by Dimming.

"If you are willing to ride with a blind man driving at 30 miles an hour, go on and continue to dim your light in the mistaken idea that you are being courteous to the drivers you meet on the road," said Maj. R. E. Carlson, engineer of the United States bureau of standards, Washington, during a recent visit in Indianapolis as a guest of the Indiana section of the Society of Automotive Engineers.

He said that statistics show that more fatalities and accidents are due to lack of light because of dimming than are caused by glaring headlights of automobiles. With a proper adjustment, which the bureau of standards recommends, the glare can be entirely eliminated.

Effect of Dimming.

Dimming the lights when driving at 30 miles an hour makes the man with the dimmed lights drive with practically no vision for at least 100 feet. It takes that long for the eyes to adjust themselves to the lessened light. He cannot see, said Major Carlson, and then is when the accident occurs. Proper adjustment of headlights will make the lights cast a flat, broad beam of light, which, at 25 feet, will concentrate below a horizontal line 3 feet above ground.

The door of a garage or a prepared screen, furnished by the bureau of standards to the American Automobile association for distribution, will facilitate such adjustment. Such a light will not glare or interfere with oncoming drivers. In spite of this simple method only 5 per cent of 400 cars examined by the bureau were properly adjusted. Seventy-five per cent glared, and 30 per cent did not give adequate light for safe driving.

Adjustment Very Simple.

On this point the driving public, the dealers and the manufacturers are more neglectful than they are of any other motorcar detail. Demonstrations showed that with the modern type of lamp equipment provided by most manufacturers, adjustment is very simple, and can be accomplished in a very few minutes by focusing the beam of each light, proper placing of the lens and proper aiming of the path of the light so that it will go straight forward and not cross the path of the other light.

He suggested a lamp-adjustment committee in every community and state to be composed of representatives of the traffic department of the city or state, members of the engineering societies, and motor club and dealers' organizations. "It is rather a matter for education and information than of law," he said.

Care of Fan Important Task for Motor Driver

Neglect of the fan is far greater than it should be even among those who pride themselves on how well they take care of their cars. It should always be remembered that the fan runs all the time the motor is in operation and that it must keep the power plant cool if maximum engine efficiency is to be secured.

If the fan hub has an oil hole, oil should be applied regularly—say twice a week. If it is provided with a grease cup, three complete turns should be given it just as often. Some cars lack the means of lubricating this important part and then disassembly of the fan is necessary to do this.

Use a mixture of light grease in which has been put a quantity of flake graphite, and pack the hub bearing liberally. Graphite will last much longer than ordinary grease, and it will not be necessary to take the fan apart for some time.

It should be kept in mind that the wearing of the fan hub bearings results in a wobble of the fan pulleys. Too much wobble will cause rattling.

Used Cars Did It

National Automobile Dealers' association statistics show that fully 68 per cent of all automobile sales include the handling of used cars; and at least 25 per cent of dealer failures last year are laid to that.

Who Is Jay Walker?

He is a menace to his own safety.

He crosses street intersections diagonally.

He crosses streets in the middle of the block.

He pops up in the street when he is least expected.

Sometimes the sidewalk isn't wide enough for him and he walks in the streets.

He keeps the motorist in constant suspense and causes the hair of the motorman to turn gray before its time.

He exposes himself to any passing vehicle and probably owes his life to the alertness of some motorist who could not have been held legally responsible if he had struck him.

The Jay walker may seem to bear a charmed life but some day he is sure to meet a Jay driver.

Varnish of New Car Is Helped by Cold Water

"The finish of many cars is literally ruined by the lack of washing, and the essential knowledge of knowing how to clean them," says J. P. Gibson, a California expert.

"The varnish of a new car is benefited and hardened by washing with clear cold water, but mud that is allowed to dry upon the body takes the oil from the varnish and leaves the finish mottled and streaky. Dirt is not the only enemy, for gases from the garage and even the atmosphere of some towns attack the finish of the car that is not frequently washed.

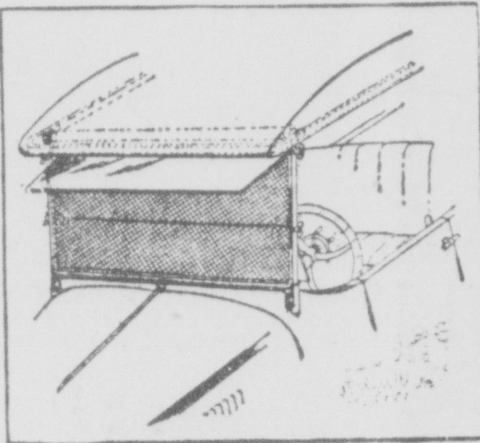

"Begin by cleaning the top. Take a good stiff brush and remove the dust, then either sponge it, or use a soft cloth with warm water and pure soap. A chamois kept especially for the purpose will tend to hasten the drying, and the top must not be folded until it is thoroughly dry.

"In cleaning the body, be sure to remove the nozzle of the hose and flow the water over every part of the body. This will serve to wash off most of the dust and also loosen the mud. In cases where the car is very dirty it is best to do this and then let it stand for a few minutes before going over it again with the hose. Then take a soft sponge and follow the hose over the body."

Protective Ventilating Screen for Automobiles

The Scientific American, in illustrating and describing a ventilating screen, the invention of B. A. Daniels of Tampa, Fla., says:

An object of this invention is to provide a simple and practical device

Ventilating Screen.

which is adapted to be detachably secured to a vehicle to protect the occupants of the vehicle from insects, missiles and other flying objects, such as gravel dust and the like. A further object is to provide a device which in its applied position will not obscure the vision or in any way interfere with the operation of the vehicle.

Automobile Hints

Watch out for children.

Brakes that hold, protect your life and your property.

Are your automobile brakes breaking the law? Have them tested today.

Don't turn the hose on your car in order to wash it. Water forced out in this way gets into impossible-to-reach places and doesn't improve the car. Use a sponge and bucket.

SEDAN AUTOMOBILES USED ON RAILROAD

Here is the latest in Sedan automobiles being used on the Southern railroad at Cincinnati, Ohio, to replace the old type of hand-car used for some time. Possibly the laborers, after a hard day with the pick and shovel might resent this intruder with its speed and luxurious ease of interior? Possibly.

ADJUSTMENT OF LIGHTS ON AUTO

Mistaken Idea That Driver Is Being Courteous to Others by Dimming.

"If you are willing to ride with a blind man driving at 30 miles an hour, go on and continue to dim your light in the mistaken idea that you are being courteous to the drivers you meet on the road," said Maj. R. E. Carlson, engineer of the United States bureau of standards, Washington, during a recent visit in Indianapolis as a guest of the Indiana section of the Society of Automotive Engineers.

He said that statistics show that more fatalities and accidents are due to lack of light because of dimming than are caused by glaring headlights of automobiles. With a proper adjustment, which the bureau of standards recommends, the glare can be entirely eliminated.

Effect of Dimming.

Dimming the lights when driving at 30 miles an hour makes the man with the dimmed lights drive with practically no vision for at least 100 feet. It takes that long for the eyes to adjust themselves to the lessened light. He cannot see, said Major Carlson, and then is when the accident occurs. Proper adjustment of headlights will make the lights cast a flat, broad beam of light, which, at 25 feet, will concentrate below a horizontal line 3 feet above ground.

The door of a garage or a prepared screen, furnished by the bureau of standards to the American Automobile association for distribution, will facilitate such adjustment. Such a light will not glare or interfere with oncoming drivers. In spite of this simple method only 5 per cent of 400 cars examined by the bureau were properly adjusted. Seventy-five per cent glared, and 30 per cent did not give adequate light for safe driving.

Adjustment Very Simple.

On this point the driving public, the dealers and the manufacturers are more neglectful than they are of any other motorcar detail. Demonstrations showed that with the modern type of lamp equipment provided by most manufacturers, adjustment is very simple, and can be accomplished in a very few minutes by focusing the beam of each light, proper placing of the lens and proper aiming of the path of the light so that it will go straight forward and not cross the path of the other light.

He suggested a lamp-adjustment committee in every community and state to be composed of representatives of the traffic department of the city or state, members of the engineering societies, and motor club and dealers' organizations. "It is rather a matter for education and information than of law," he said.

Care of Fan Important Task for Motor Driver

Neglect of the fan is far greater than it should be even among those who pride themselves on how well they take care of their cars. It should always be remembered that the fan runs all the time the motor is in operation and that it must keep the power plant cool. If maximum engine efficiency is to be secured.

If the fan hub has an oil hole, oil should be applied regularly—say twice a week. If it is provided with a grease cup, three complete turns should be given it just as often. Some cars lack the means of lubricating this important part and then disassembly of the fan is necessary to do this.

Use a mixture of light grease in which has been put a quantity of flake graphite, and pack the hub bearing liberally. Graphite will last much longer than ordinary grease, and it will not be necessary to take the fan apart for some time.

It should be kept in mind that the wearing of the fan hub bearings results in a wobble of the fan pulleys. Too much wobble will cause rattling.

Used Cars Did It

National Automobile Dealers' association statistics show that fully 68 per cent of all automobile sales include the handling of used cars; and at least 25 per cent of dealer failures last year are laid to that.

Who Is Jay Walker?

He is a menace to his own safety.

He crosses street intersections diagonally.

He crosses streets in the middle of the block.

He pops up in the street when he is least expected.

Sometimes the sidewalk isn't wide enough for him and he walks in the streets.

He keeps the motorist in constant suspense and causes the hair of the motorman to turn gray before its time.

He exposes himself to any passing vehicle and probably owes his life to the alertness of some motorist who could not have been held legally responsible if he had struck him.

The jay walker may seem to bear a charmed life but some day he is sure to meet a jay driver.

Varnish of New Car Is Helped by Cold Water

"The finish of many cars is literally ruined by the lack of washing, and the essential knowledge of knowing how to clean them," says J. P. Gibson, a California expert.

"The varnish of a new car is benefited and hardened by washing with clear cold water, but mud that is allowed to dry upon the body takes the oil from the varnish and leaves the finish mottled and streaky. Dirt is not the only enemy, for gases from the garage and even the atmosphere of some towns attack the finish of the car that is not frequently washed.

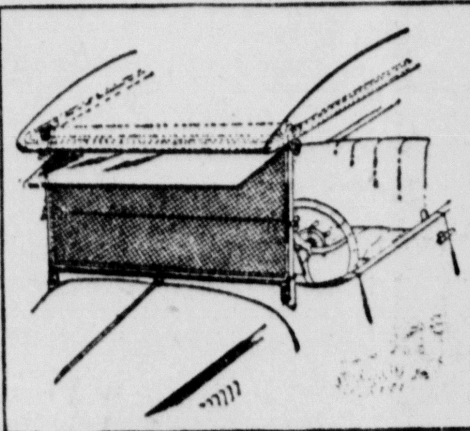

"Begin by cleaning the top. Take a good stiff brush and remove the dust, then either sponge it, or use a soft cloth with warm water and pure soap. A chamois kept especially for the purpose will tend to hasten the drying, and the top must not be folded until it is thoroughly dry.

"In cleaning the body, be sure to remove the nozzle of the hose and flow the water over every part of the body. This will serve to wash off most of the dust and also loosen the mud. In cases where the car is very dirty it is best to do this and then let it stand for a few minutes before going over it again with the hose. Then take a soft sponge and follow the hose over the body."

Protective Ventilating Screen for Automobiles

The Scientific American, in illustrating and describing a ventilating screen, the invention of B. A. Daniels of Tampa, Fla., says:

An object of this invention is to provide a simple and practical device

Ventilating Screen.

which is adapted to be detachably secured to a vehicle to protect the occupants of the vehicle from insects, missiles and other flying objects, such as gravel dust and the like. A further object is to provide a device which in its applied position will not obscure the vision or in any way interfere with the operation of the vehicle.

Automobile Hints

Watch out for children.

Brakes that hold, protect your life and your property.

Are your automobile brakes breaking the law? Have them tested today.

Don't turn the hose on your car in order to wash it. Water forced out in this way gets into impossible-to-reach places and doesn't improve the car. Use a sponge and bucket.

"The Store That Treats You Right"

"I'd Know the Name If I Heard It"---

said a young Ashville man who stopped in to see us a week ago.

He asked for a certain make of shirt that he had purchased in New York and it had been the most perfect shirt he had ever owned.

"Was it a long name?" we asked. He scratched his head.

"Was it a Red Label trade mark?" He wrinkled his brow.

"Was it a Bond Street Shirt?" He showed his teeth.

"That's it!" he exclaimed---"and if you have that brand in stock I'll take half a dozen."

Selling Bond Street Summer Shirts in lots of three to twelve is about all we do between 6:00 and 8:00.

New Ideas Every Week---
